

South Dakota Soybean Research & Promotion Council
 SDSU Swine Research & Education Facility Classroom
 2221 Medary Avenue, Brookings, SD

April 4, 2018

9:00	Welcome	TBD
9:05	Utilization of Weather and Climate Information for Weed Management	<i>Nathan Edwards on behalf of Laura Edwards</i>
9:20	Enzymatic Upgrading of SBM	<i>Mike Brown</i>
9:35	Nutrient and Bacteria Removal Using Bioreactors and Filters	<i>Rachel McDaniel</i>
9:50	Developing Beneficial Seed Inoculum to Promote Soybean Yield	<i>Shin-Yi Marzano</i>
10:05	AM Fungi and Their Effects on SCN	<i>Heike Bucking</i>
	Maximizing Soybean Yields Through Efficient Plant/Microbe Interactions	<i>Heike Bucking</i>
10:30	Break	
10:45	Achieving 100 bu soybeans	<i>Dave Clay</i>
		<i>Paul O. Johnson on behalf of Sharon Clay</i>
11:00	Controlling Weeds in Soybeans	
11:15	Evaluating Foliar Insecticide Efficacies	<i>Adam Varenhorst</i>
11:30	Soil Conditioners Influencing Soil Moisture, Soil and Plant Nutrients	<i>Sandeep Kumar</i>
11:45	Investigating Alternative Nematicides and Continued SCN Education/Management	<i>Emmanuel Byamukama</i>
	Investigating Nutrient Supplement and White Mold Management	<i>Emmanuel Byamukama</i>
12:10	Break	
1:00	Improve Understanding of Fusarium Causing Disease on Soybeans in SD	<i>Febina Mathew</i>
1:15	Increasing Demand for US Soy in SE Asia	<i>Crystal Levesque on behalf of Bob Thaler</i>
1:30	SDSRPC Executive Session
