

Comments Regarding SD10 Through Sisseton

We, the citizens of the city of Sisseton and Roberts County, petition the SD Department of Transportation to reconsider the proposed changes on Highway 10 from west city limits to 8th Ave East – i.e. 2 roundabouts and changing 4 lanes to 2 lanes with a turning lane.

We see many issues in changing the 4 lane highway to 2 lanes with a turning lane and adding 2 roundabouts.

- Some farm equipment takes 2 lane widths. They will either have to use part of the center turning lane if there are no vehicles in the lane OR they will have to detour around the town. This is a farming community and it would be a great inconvenience.
- Merging 2 lanes of west bound traffic down to 1 lane prior to the east roundabout will slow traffic and create accidents.
- Vehicles that are required by law to STOP at Railroad crossing will be slowing traffic in the only driving lane. i.e. busses, fuel transports, propane trucks
- Extra-long loads will have difficulty maneuvering the roundabouts.

We demand that the SD Department of Transportation review this Controversial Hwy 10 Project and look at stop lights and leaving the four lanes the way they have existed for years.

We, the citizens of the city of Sisseton and Roberts County, petition the SD Department of Transportation to reconsider the proposed changes on Highway 10 from west city limits to 8th Ave East – i.e. 2 roundabouts and changing 4 lanes to 2 lanes with a turning lane.

We see many issues in changing the 4 lane highway to 2 lanes with a turning lane and adding 2 roundabouts.

- Some farm equipment takes 2 lane widths. They will either have to use part of the center turning lane if there are no vehicles in the lane OR they will have to detour around the town. This is a farming community and it would be a great inconvenience.
- Merging 2 lanes of west bound traffic down to 1 lane prior to the east roundabout will slow traffic and create accidents.
- Vehicles that are required by law to STOP at Railroad crossing will be slowing traffic in the only driving lane. i.e. busses, fuel transports, propane trucks
- Extra-long loads will have difficulty maneuvering the roundabouts.

We demand that the SD Department of Transportation review this **Controversial Hwy 10 Project** and look at stop lights and leaving the four lanes the way they have existed for years.

Jared Wahlisch	45469 SD HWY 10	605-237-5922	Jared Wahlisch	4-29-16

We, the citizens of the city of Sisseton and Roberts County, petition the SD Department of Transportation to reconsider the proposed changes on Highway 10 from west city limits to 8th Ave East – i.e. 2 roundabouts and changing 4 lanes to 2 lanes with a turning lane.

We see many issues in changing the 4 lane highway to 2 lanes with a turning lane and adding 2 roundabouts.

- Some farm equipment takes 2 lane widths. They will either have to use part of the center turning lane if there are no vehicles in the lane OR they will have to detour around the town. This is a farming community and it would be a great inconvenience.
- Merging 2 lanes of west bound traffic down to 1 lane prior to the east roundabout will slow traffic and create accidents.
- Vehicles that are required by law to STOP at Railroad crossing will be slowing traffic in the only driving lane. i.e. busses, fuel transports, propane trucks
- Extra-long loads will have difficulty maneuvering the roundabouts.

We demand that the SD Department of Transportation review this **Controversial Hwy 10 Project** and look at stop lights and leaving the four lanes the way they have existed for years.

Subject: roundabout

There is a discussion of a roundabout coming to Sisseton, South Dakota. I live in this town and there is NO NEED for a roundabout. The people were just asking for a stop light on 8th Ave. E and 8th Ave. W. so it would help the traffic to turn east. Roundabout is NO SOLUTION TO THE PROBLEM!

With all the semis, long trailers and farm equipment plus school busses when school starts again, that would just create more problems with all the traffic and people trying to figure those corners etc., on a roundabout plus all the native americans that are always walking on the highway. It would just be accidents waiting to happen!! The stop lights would cost less and cause less construction problems. The people of Sisseton have voiced their opinions at meetings and the state doesn't seem to listen to our views. This is our town so we should have the say in what is better for our way of life/ driving.

Please voice our concerns with Dave Bergquist / South Dakota Dept of Transportation that a **ROUNDABOUT is NOT THE SOLUTION FOR SISSETON.**

Thank you.
