# CRMCS To Go!

## Top Ten Benefits of the CRMCS

1. Personnel accountability
2. Resource identification and management
3. Ability to integrate GIS mapping of deployable resources
4. Situational awareness of an incident via interTRAX exchange
5. Sharing of the workload by allowing usernames and passwords for individual agencies or organizations to update their own data
6. Quick visual reference of deployable resources
7. Medical certification/license/registration verification for first responders
8. Helps facilitate mutual aid
9. Accessible from anywhere with an internet connection
10. Flawless integration with surrounding states that utilize Salamander

## Overview

CRMCS stands for Comprehensive Resource Management and Credentialing System. It is a resource management and situational awareness tool that combines many systems to increase effectiveness and efficiency of emergency services. At its core, it is an intelligent accountability system that allows responders to tag, track, and report on assets during incidents or pre-planned events.

Several states have implemented accountability and credentialing systems in accordance with NIMS, NFPA and State Strategic Goals for homeland security. CRMCS builds upon these systems to provide agencies statewide the opportunity to benefit from these capabilities.

## WHAT IS INTELLIGENT ACCOUNTABILITY™?

Intelligent Accountability™ is the real time tagging, tracking, and reporting of people and resources at the scene of an incident from anywhere in the world.

IA links physical with digital. It provides off-location command centers and on-scene responders with a common operating picture. IA is more data, better data, and faster decisions to save lives

**STANDARD ACCOUNTABILITY** "ACCOUNTABILITY IN SILOS"  
**INTELLIGENT ACCOUNTABILITY** INTEGRATED. COMPREHENSIVE. REAL TIME.

### 01 TAG IDENTITY MANAGEMENT

On and off-scene identification for personnel, equipment, visitors, victims, and more.

### 02 TRACK INCIDENT MANAGEMENT

On-scene computerized incident management allows you to capture data, verify identities, and track resources.

### 03 REPORT RESOURCE MANAGEMENT

Share evacuee, resource, and personnel data from the incident to off-scene agencies in real time to provide a common operating picture.
