**Southeast Technical College**  
**Dental Assisting Program Update**  
**January 2021**

**Purpose:**

To provide the South Dakota Board of Dentistry an update on the dental assisting program and any developments related to the CODA application.

---

- Twenty-two students successfully completed the first semester of coursework and enrolled for the Spring semester. The students completed the following courses during the Fall 2020 term:
    - **Introduction to Dental Assisting:** Students will demonstrate an understanding of basic knowledge of dental history, professional ethics, jurisprudence, state dental practice act, risk management and its application to the dental profession.
    - **Dental Therapeutic and Medical Emergencies:** Students will demonstrate an understanding on how to assist with the management of medical and dental emergencies, have an understanding of the drugs used in dentistry, drugs the patients are taking for a specific medical condition, the terminology and usage of prescriptions, the understanding of anesthesia and local pain control used in dentistry.
    - **Infection Control:** Students will be able to manage infection and hazard control protocol consistent with professional guidelines.
    - **Dental Sciences and Preventive Dentistry:** Students will be able to apply the knowledge of the oral and maxillofacial structures to assist in the care of the patient, and the knowledge to discuss the role preventive dentistry and how important good nutrition plays in maintaining optimal dental health.
    - **Dental Procedures and Techniques:** Students will be able to identify dental hand instruments and handpieces, demonstrate proper techniques during the transfer of dental hand instruments, use of oral evacuation systems, and the responsibilities of maintaining moisture control during chairside assisting.
    - **Dental Materials:** Students will be able to apply the knowledge of the general characteristics of each type of dental material, the selection criteria, and ways to prepare the restorative and esthetic materials for a procedure. Fabricate and perform laboratory procedures associated with chairside dental assisting.
  - Construction of the dental assisting facilities is complete and all equipment has been installed. See the attached photos.
  - Students will participate in externships during Summer 2021. Specific placements are being identified, vetted, and arranged. Two students will complete their externship in Hot Springs.
  - At this time, CODA is not accepting new applications as the electronic submission process is still in development. We anticipate an update following the next CODA Board Meeting on February 11-12.
  - Because we decided to move forward with our inaugural dental assisting class this Fall prior to CODA accreditation, once CODA resumes accepting applications we will need to submit the Fully Operational application rather than the Initial Accreditation application that we originally prepared. We are working diligently to update our application to include the requested data and evidence to support the narrative. We will be prepared to submit the Fully Operational application once CODA re-opens the process and our first class of students graduate.

Brittany,

Thank you for reaching our regarding my vaccination in dental offices question. I would be interested to hear if anything additional ever develops.

Also, as we discussed Horizon is excited to finally implement synchronous Teledentistry at our clinics. With this I would like to know from the Board of Dentistry perspective if that would qualify as direct supervision. There is a high dental need due to periodontal disease for patients that would benefit from scaling and root planing with local anesthetic and a barrier to have a dentist in office at the same time due to the remote nature of some of our clinics in South Dakota. Could the direct supervision be provided via technology where a dentist is readily available in case of an adversary event so that these patients could get the care that is needed?

Thank you for your time and bringing my question to the Board of Dentistry.

Sincerely,

## Things You Should Have Been Taught in Oral Pathology, But Weren't

Don-John Summerlin, DMD, MS

Although the understanding of pathology is the basis for all clinical practice, most clinicians rely on their basic pathology training from professional school in the evaluation of their patients. Much of this information is fundamental understanding, but it often lacks practical relevance. This course is designed to facilitate the practical application of pathologic knowledge. In so doing, the areas covered will include, but not necessarily limited to:

1. Direct immunofluorescence – what are its uses and when is it useful?
2. Lichen planus – specific disease or clinical manifestation?
3. Epithelial dysplasia – what is it and what should I do about it?
4. Leukoplakia – why and when should you be concerned about a white patch?

At the conclusion of this discussion, the participants should be better able to discern differences between a number of disease entities and to apply criteria to determine the appropriate course of action for the patient.

Don-John Summerlin, DMD, MS

Biographical Sketch

Dr. Summerlin received his dental degree from the University of Alabama School of Dentistry and his specialty training in Oral and Maxillofacial Pathology from Indiana University School of Dentistry. He is a diplomate of the American Board of Oral and Maxillofacial Pathology. He served on the faculty of Indiana University School of Dentistry for 20 years and the Indiana University School of Medicine Department of Pathology and Laboratory Medicine for another 13 years. Dr. Summerlin served as the president of the Fellowship Committee of the American Academy of Oral and Maxillofacial Pathology and as a site visitor for accreditation of Oral Pathology programs. Dr. Summerlin has received numerous teaching awards over the years from both students and institutions, including the only dentist ever to be presented the teaching award for the Indiana University School of Medicine Department of Pathology and Laboratory Medicine.
