

BOARD OF WATER AND NATURAL RESOURCES

March 27, 2025

10:30 a.m. CT

**In-Person or On-Line
Matthew Training Center
Joe Foss Building**

The public may participate in-person, by live audio, or by streaming through a computer or other mobile device. The full board packet and directions for access to the meeting and live streaming can be found on the South Dakota Boards and Commissions Portal at <http://boardsandcommissions.sd.gov/Meetings.aspx?BoardID=108>

AGENDA

****Scheduled times are estimates only. Some items may be delayed due to prior scheduled items or may be moved up on the agenda.****

March 27, 2025

10:30 a.m. CT

1. Call meeting to order and roll call
2. Approve Agenda
3. Approve Minutes of January 9, 2025, Board Meeting
4. Public Comment Period
5. Fort Pierre Request to Deobligate Drinking Water SRF Loans C462049-01 and C462049-02 – Tina McFarling
6. Amendment to Mid-Dakota Rural Water System Drinking Water SRF Loan C462430-07 Resolution – Andy Bruels
7. Amendments to the State Water Plan and 2025 Clean Water SRF and 2025 Drinking Water SRF Intended Use Plans – Andy Bruels
 - a. Carriage Hills Water Association
 - b. Henry
 - c. North Sioux City
 - d. Rapid City
 - e. Salem
 - f. Salem
 - g. Wessington
8. Dakota Mainstem Regional Water System State Water Resources Management System Grant Agreement Amendment – Andy Bruels
9. WEB Water Development Association State Water Resources Management System Grant Agreement Amendment – Andy Bruels
10. Legislative Update – Tina McFarling
11. Meeting Schedule for SFY 2026 – Tina McFarling

Recess:

11:30 a.m. CT

Reconvene:
1:00 p.m CT

12. Drinking Water Facilities Funding Applications – Andy Bruels

- a. Grant-Roberts Rural Water System (239)
- b. WEB Water Development Association (150)
- c. Perkins County Rural Water System (111)
- d. Wessington Springs (104)
- e. Mitchell (98)
- f. Buffalo Gap (97)
- g. Bryant (93)
- h. Fall River Water User District (89)
- i. Oak Mountain Country Estates HOA (87)
- j. Alcester (84)
- k. Hill City (74)
- l. Canton (11)
- m. Dell Rapids (11) – Orleans Avenue
- n. White (9)
- o. Dell Rapids – Western Extension (NA)

13. Sanitary/ Storm Sewer Funding Applications – Tina McFarling

- a. Columbia (26)
- b. Canton (24)
- c. Hill City (22)
- d. Groton (21)
- e. Aberdeen (18)
- f. Gettysburg (15)
- g. Box Elder (14)
- h. Wessington Springs (14)
- i. Bison (13)
- j. Hecla (12)
- k. Mitchell (12)
- l. Dell Rapids (10) – Orleans Avenue
- m. White (10)
- n. Webster (9)
- o. Dell Rapids (8) – Western Extension
- p. Bryant (7)
- q. Keystone (7)
- r. Oacoma (7)
- s. Veblen (7)
- t. Garden City (6)
- u. Java (6)

14. Solid Waste Management Program Funding Applications – Andy Bruels

- a. Brown County – Landfill Compactor Purchase
- b. Brown County – Landfill Cell #5 Construction
- c. Department of Agriculture and Natural Resources
- d. Huron
- e. Mitchell
- f. Platte
- g. Roberts County
- h. SD Solid Waste Management Association
- i. South Eastern Council of Governments
- j. Southern Missouri Recycling and Waste Management District – New Baler Purchase
- k. Southern Missouri Recycling and Waste Management District – Landfill #4 Construction
- l. Vermillion

15. Small Water Facilities Funding Applications – Tina McFarling

- a. Two Bit Ranch Estates HOA
- b. Viewfield Rural Water Association

16. June 26-27, 2025, Meeting

17. Adjourn

Notice is given to individuals with disabilities that the meeting is being held in a physically accessible location. Individuals requiring assistive technology or other services in order to participate in the meeting or materials in an alternate format should contact Brian Walsh, Nondiscrimination Coordinator, by calling (605) 773-5559 or by email at Brian.Walsh@state.sd.us as soon as possible but no later than two business days prior to the meeting in order to ensure accommodations are available.

The audio recording for this meeting is available on the South Dakota Boards and Commissions Portal at <http://boardsandcommissions.sd.gov/Meetings.aspx?BoardIDis108>

Minutes of the
Board of Water and Natural Resources Meeting
In-Person or On-Line
Matthew Training Center
523 East Capitol
Pierre, South Dakota

January 9, 2025
1:00 p.m. Central Time

CALL MEETING TO ORDER: Chairman Jerry Soholt called the meeting to order. The roll was called, and a quorum was present.

Chairman Soholt announced that the meeting was streaming live on SD.net, a service of South Dakota Public Broadcasting.

BOARD MEMBERS PRESENT: Jerry Soholt, Cameron Becker, Todd Bernhard, Gary Drewes, Bruce Jennings, Gene Jones, Jr., and Jackie Lanning.

BOARD MEMBERS ABSENT: None.

LEGISLATIVE OVERSIGHT COMMITTEE: Representative Mike Weisgram.

OTHERS: See attached attendance sheets.

APPROVE AGENDA: Motion by Jennings, seconded by Bernhard, to approve the agenda as posted. The motion carried unanimously.

APPROVE MINUTES FROM NOVEMBER 7, 2024, MEETING: Motion by Bernhard, seconded by Jones, to approve the minutes from the November 7, 2024, Board of Water and Natural Resources meeting. The motion carried unanimously.

PUBLIC COMMENT PERIOD: There were no public comments.

SECTION 319 APPLICATIONS: Kris Dozark, Section 319 Implementation Coordinator, DANR Watershed Protection Program, reported that the Board of Water and Natural Resources is the designated entity that provides the state's Section 319 nonpoint source project funding recommendations to EPA. The board considers recommendations from the Nonpoint Source (NPS) Task Force as part of its selection process.

Four applications requesting \$4,624,250 in Section 319 funding were received by DANR, reviewed by the NPS Task Force, and will be presented to the board today.

The 2025 Clean Water State Revolving Fund (SRF) Intended Use Plan authorized the use of \$200,000 in administrative surcharge fees for Water Quality grants to supplement the Section 319

programs for Total Maximum Daily Load (TMDL) implementation projects. Staff anticipates receiving \$2,644,000 in Section 319 funds, which is at the same level of last year's allocation. The DANR and NPS Task Force recommendations summarized in the table included in the board packet reflect both the anticipated FFY 2025 Section 319 federal funding allocation and \$200,000 in Clean Water SRF Water Quality grant awards. The department proposes to use \$842,000 for administration of the NPS program, which leaves \$2,002,000 for pass-through grants.

With final FFY 2025 appropriation levels being delayed until the new budget is in place, DANR recommended that up to \$200,000 in Water Quality grant funding be allocated for these projects. If a decrease in Section 319 funding occurs, all pass-through grants will be reduced proportionately.

Mr. Dozark presented the four applications and recommended funding levels as follows:

Belle Fourche River Watershed Management and Project Implementation Plan – Segment 11

Sponsor: Belle Fourche River Watershed Partnership

Total Cost: \$5,796,000

Section 319 Grant Request: \$2,297,000

The Belle Fourche River Watershed Partnership is the project sponsor for this project. This is the eleventh segment that addresses seven TMDLs. Activities planned for this segment would continue implementing best management practices (BMPs) that reduce E. coli and TSS pollutants. These BMPs include: (1) installing irrigation sprinkler systems, (2) implementing riparian and range grazing management systems, (3) installing riparian/bank stability improvements, (4) implementing improved cropping systems, (5) improving and/or relocating livestock feeding areas.

DANR staff and the NPS Task Force recommended \$825,000 in Section 319 funds.

The recommendation is based on previous expenditures and the sponsor's ability to successfully leverage funds from other partners. The sponsor is encouraged to keep leveraging funds from multiple sources including Regional Conservation Partnership Program (RCPP) and the Conservation Commission grants.

Big Sioux River Watershed Project – Segment 5

Sponsor: Minnehaha Conservation District

Total Cost: \$11,653,175

Section 319 Grant Request: \$1,031,750

The Big Sioux River Watershed Project is a multi-year TMDL implementation strategy that will be completed in multiple segments. The project will restore and/or maintain the water quality of the Big Sioux River and its tributaries to meet the designated beneficial uses. The Lower Big Sioux River, Central Big Sioux River and the North-Central Big Sioux River/Oakwood Lakes Watershed Assessment identified various segments of the Big Sioux River and certain tributaries between Estelline, South Dakota and Sioux City, Iowa as failing to meet designated uses due to impairments from total suspended solids (TSS), dissolved oxygen and/or bacteria. This project (Segment 5) is focused on further reducing loadings from soil erosion, animal feeding operations, damaged riparian areas, and expanding ongoing project activities. It also extends water quality monitoring through 2030.

DANR staff and the NPS Task Force recommended \$525,000 in Section 319 funds.

The recommendation is based on the project's ability to leverage funds from other sources, specifically Clean Water SRF loan funds from the city of Sioux Falls and Dell Rapids and the history of spending Section 319 funds. The leveraging of those funds allows for conservation practices to be implemented without funding from Section 319 dollars. The sponsor is also encouraged to possibly leverage funds from the Conservation Commission.

Prairie Coteau Watershed Improvement and Protection Project – Segment 1 (Amendment)

Sponsor: Day County Conservation District

Total Cost: \$3,759,521

Section 319 Grant Request: \$1,095,500

The goal of this project is to protect and improve the water quality of northeast South Dakota glacial lakes, streams, and rivers by implementing conservation practices that reduce the amount of fecal coliform bacteria, nutrients, and sediment loads entering project water bodies, maintaining their assigned beneficial uses, and to build on previous efforts and protect water quality improvements realized from previous implementation projects and segments. This project combines two multi-year locally led watershed projects: Northeast Glacial Lakes Watershed Improvement and Protection Project (Segment 5) and Upper Big Sioux Watershed Project (Segment 7) into one project now called the "Prairie Coteau Watershed Improvement and Protection Project."

DANR staff and the NPS Task Force recommended \$252,000 in Section 319 funds and \$200,000 in Clean Water SRF water quality funding.

The recommendation is based on previous expenditures, funding remaining in the current segment, and the sponsor's ability to successfully leverage funds from other partners. The sponsor is also encouraged to continue seeking funding from the Conservation Commission grants.

Rapid Creek Watershed Project – Segment 1

Sponsor: West Dakota Water Development District

Total Cost: \$333,333

Section 319 Grant Request: \$200,000

The goal of this three-year project is to protect and improve water quality through planning and implementation of erosion control, stream restoration, and soil and riparian health BMPs in the Rapid Creek watershed located in the Black Hills of South Dakota. The project will also implement BMPs to address protection of non-303(d) listed waters in the Rapid Creek watershed. Outreach will include planning and holding workshops and field demonstration tours to educate and inform the public and producers of ways to manage land to reduce runoff and erosion to ultimately improve and protect water quality.

DANR staff and the NPS Task Force recommended \$200,000 in Section 319 funds.

The recommendation is to fully fund this project. The watershed-based plans will allow for future recommendations for implementing conservation practices that will help protect the high-quality

waters in the Rapid Creek watershed. Cooperation with the South Dakota Game Fish and Parks and other partnering agencies throughout the planning process will be vital to the success of the plans that are developed. In the Cooperating Organizations section, change “will” provide technical and financial assistance to “may” provide technical and financial assistance.

Mr. Jay Gilbertson, former chair of the NPS Task Force, reported that on December 12, 2024, the task met to review the projects, and voted to concur with the DANR funding recommendations.

Mr. Dozark requested that the board authorize DANR to enter into a grant agreement with Day County Conservation District in the amount of \$200,000 from Clean Water SRF administrative surcharge fees pursuant to the 2025 Clean Water SRF Intended Use Plan contingent upon the 2025 Legislature authorizing the required budget authority for the awards. This will allow the department to prepare and execute one agreement with this entity for both the Section 319 and Clean Water administrative surcharge fee funds and not have to bring this back before you for approval of a separate Water Quality grant.

Motion by Jones, seconded by Lanning, to authorize the department to enter into a grant agreement with Day County Conservation District in the amount of \$200,000 from Clean Water SRF administrative surcharge fees pursuant to the 2025 Clean Water SRF Intended Use Plan contingent upon the 2025 Legislature authorizing the required budget authority for the awards. The motion carried unanimously.

Mr. Dozark also requested that the board concur with the funding recommendations of the department and the Nonpoint Source Task Force and authorize the department to forward the FFY 2025 Section 319 funding recommendations to EPA with adjustments to final federal funding level.

Motion by Jennings, seconded by Drewes, to concur with the funding recommendations of the department and the Nonpoint Source Task Force and authorize the department to forward the FFY 2025 Section 319 funding recommendations to EPA with adjustments to the final federal funding level. The motion carried unanimously.

RIPARIAN BUFFER INITIATIVE (RBI) PRESENTATION: Mr. Dozark provided a slide presentation discussing the Riparian Buffer Initiative.

In 2021, House Bill 1256 appropriated \$3,000,000 to DANR for restoration of the Big Sioux River watershed. DANR developed the Riparian Buffer Initiative (RBI) project with input from conservation partners.

RBI fact sheets were developed to define eligibility and payment rates. Tanner Clausen with the DANR Watershed Protection Program in the Sioux Falls office was assigned to coordinate the project. Mr. Dozark noted that the RBI was somewhat based off of the Big Sioux River project Seasonal Riparian Area Management project. The first RBI contract was signed in December 2023.

Currently there are 41 contracts in the Big Sioux River watershed buffering 672 acres at a cost of approximately \$1,300,000; and there are 28 potential projects buffering 480 acres in the Big Sioux River watershed, and for 21 of those potential projects the cost is approximately \$1,400,000.

In 2022, the Board of Water and Natural Resources awarded \$1,000,000 in ARPA funds to DANR for the RBI to take the program statewide. The first project was in the James River watershed in April 2024.

In 2024, the Board awarded an additional \$5,000,000 in ARPA funds, and Nathan Andersen was hired to work on the RBI in western South Dakota.

Statewide there are currently 14 stream contracts, mostly on the James River and Vermillion River, buffering 770 acres at a cost of approximately \$1,300,000. There are 11 potential projects buffering 930 acres, and for nine of those potential projects the cost is approximately \$1,700,000.

Mr. Dozark stated that staff has had good collaborations with DANR 319 nonpoint source project coordinators, Cory Zerbel with the Prairie Coteau project in the northeast part of the state, Barry Berg with the Big Sioux project, the South Central Watershed project, the Pheasants Forever, Game, Fish and Parks, Ducks Unlimited biologists, NRCS staff, and the county Conservation District staff. He noted that this has been a very successful program.

There were no questions from the board.

PROPOSED ADJUSTMENTS TO SRF LOAN INITIAL AMORTIZATION DATE PAYMENTS:

Tina McFarling reported that during the June 2024 meeting, staff started the discussions about cash flow and program capacity. Both SRF programs have capacity to support the funding requests that are being received; however, if the project requests and project costs continue at these historic levels, funding for future requests may be limited.

In discussions with the financial advisor and bond counsel, staff learned that there are several programmatic changes that make a significant impact to the fund stability. The first option was addressed during the June 2024 meeting when the board adjusted interest rates for nonprofit corporation borrowers. Other solutions suggested were adjusting loan amortization payment schedules, using the priority points system, and limiting the projects that receive funding.

Currently the initial amortization payment schedule is set when all loan funds have been drawn, or when the project has been completed, or when the loan enters repayment at the two-year mark of the loan if the loan has not been fully drawn or the project has not been completed. For the first two scenarios, the initial amortization payment schedule is based on the loan amount drawn and the accrued interest and administrative fees to date.

For loans that enter repayment, the initial amortization schedule is based on the amount of principal drawn and the accrued interest and fees. After this period, the amortization payment schedules are recalculated semi-annually until either the project is complete, or the loan funds are fully drawn. Then a final amortization schedule is calculated.

Ms. McFarling said the proposed change only applies to loans that enter repayment at the two-year mark. We are proposing that the principal repayment portion of the amortized loan payment schedule be based on the total loan amount and not the loan amount that has been drawn at the point of entering repayment. The process does not change for loans that have had the principal amount fully drawn or the project is complete prior to repayment.

There are several benefits for both the SRF programs and for the borrowers. For the SRF programs this provides a timeline and known amounts for future principal repayments and this in turn helps staff accurately predict principal repayment revenue for future debt service and loans. For the borrowers this first and foremost provides the benefit of a full 20-year or 30-year level debt service resulting in slightly lower payments over time and in total. The principal repayment will be set at the time of closing and will give the borrower and its users a better understanding and time to prepare for future payments. If the loan amount drawn is less than the amount of loan at loan closing, the amortization scheduled will be recalculated at the drawn loan amount and total repayments will be lower due to the higher amount of principal already paid.

Department staff will continue to work with the financial advisor, trustee, and legal counsel to update loan language to implement the proposed structure. The goal is to have this in place for all loans being closed on or after March 1, 2025.

Staff recommended that the board approve the staff to continue to work with financial advisors and legal counsel to update the loan agreements.

Motion by Bernhard, seconded by Drewes to approve the staff to continue to work with financial advisors and legal counsel to update the loan agreements.

Mr. Jennings stated that many of these projects involve added connections and the expectation of added revenue from those connections. He asked if staff took into consideration that cash flow on borrower's side if they're asked to pay the final principal before all that revenue is available.

Mr. Bruels said he believes Mr. Jennings is asking if the borrower has an issue with that cash flow on the front end with a slightly higher repayment. He said when a loan is closed, the borrower is required to have the rate structure in place, based on their current users, to provide 110 percent debt coverage of the full loan amount at that two-year period. So, the borrower is already generating the income revenue sufficient and necessary to cover the full loan amount. Currently, the borrowers haven't been necessarily utilizing it to make those repayments, so the income revenue is available to them and is part of that loan closing process.

The motion carried unanimously.

DRINKING WATER FACILITIES FUNDING APPLICATIONS: Mr. Bruels provided an overview of available funds. He then presented the funding applications and staff recommendations.

Wagner is proposing to install new water main to provide looping of dead ends along SD Highway 46 in conjunction with a proposed SD Department of Transportation project to improve SD Highway 46 through Wagner. The installation of the water main will connect several smaller lines that provide water in portions of the city, as well as connecting some six-inch lines.

The estimated project amount is \$1,400,000, and the amount requested is \$1,400,000.

Staff recommended awarding a \$1,400,000 Drinking Water SRF loan at 3.25 percent interest for 30 years with 36.8 percent as principal forgiveness not to exceed \$515,000.

Wagner pledged a project surcharge for repayment of the loan. Rates are \$59.25 for 5,000 gallons. Staff analysis indicates a surcharge of \$5.75 is needed for repayment of the loan, which would bring overall rates to \$65.00.

Staff recommended the loan being contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage.

Jeff McCormick, SPN, discussed the project.

Motion by Lanning, seconded by Becker, to adopt **Resolution No. 2025-01** approving a Drinking Water State Revolving Fund loan up to a maximum committed amount of \$1,400,000 at 3.25 percent interest for 30 years with 36.8 percent as principal forgiveness not to exceed \$515,000 to the **city of Wagner** to install new water main along SD Highway 46, and authorizing the execution of the loan agreement, the acceptance of the Local Obligation, the assignment of the Local Obligation to the Trustee, and the execution and delivery of such other documents and the performance of all acts necessary to effectuate the loan approved in accordance with all terms as set forth in the Indenture of Trust, contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage. The motion carried unanimously.

SANITARY/STORM SEWER FUNDING APPLICATIONS: Tina McFarling presented the applications and staff recommendations for funding.

Mitchell requested funding to address persistent water quality problems related to elevated phosphorus and resulting algae blooms at Lake Mitchell. The city proposes removal of lake sediment by drawing down the lake to expose the sediments and dredging the sediment. Traditional earthwork equipment, such as excavators, bulldozers, and draglines, will be used to remove the sediment, which will be transported to a disposal site in Firesteel Park or elsewhere in the vicinity of the lake. It is estimated that up to 2,000,000 cubic yards of sediment will be removed. The project will also include management of inflow from external sources to reduce the amount of sediment entering the lake.

The estimated project amount is \$25,000,000, and the amount requested is \$16,815,900. Other Funding for the project includes \$8,184,100 in local cash.

Staff recommended awarding a \$16,815,900 Clean Water SRF loan at 3.50 percent interest for 20 years. The city pledged sales tax revenue for repayment of the loan. Staff analysis indicates that sales tax will provide over 500 percent debt coverage.

Staff recommended the loan being contingent upon the borrower adopting a bond resolution and the resolution becoming effective.

Joe Schroeder, city of Mitchell, discussed the project and answered questions from the board.

Motion by Bernhard, seconded by Jones, to adopt **Resolution No. 2025-02** approving a Clean Water State Revolving Fund loan up to a maximum committed amount of \$16,815,900 at 3.50 percent interest for 20 years to the **city of Mitchell** for dredging at Lake Mitchell, and authorizing the execution of the loan agreement, the acceptance of the Local Obligation, the assignment of the Local Obligation to the Trustee, and the execution and delivery of such other documents and the performance of all acts necessary to effectuate the loan approved in accordance with all terms as set forth in the Indenture of Trust, contingent upon the borrower adopting a bond resolutions and the resolution becoming effective. The motion carried unanimously.

Wagner requested funding for a project to replace sewer infrastructure along SD Highway 46. The project is planned to be undertaken in conjunction with the reconstruction of Highway 46 through the city. The project will consist of the replacement of the existing sewer lines along the Highway 46 corridor from Washington Avenue to Haar Avenue, a total distance of approximately 4,300 feet. The majority of sewer work will involve replacement of the sewer mains that cross the highway.

The estimated project amount is \$425,000, and the amount requested is \$425,000.

Staff recommended awarding a \$425,000 Clean Water SRF loan at 3.75 percent interest for 30 years.

Wagner pledged a project surcharge for repayment of the loan. The city has a flat rate of \$34.00 per month. Staff analysis indicates a surcharge of \$2.90 is needed for repayment of the loan, bringing rates to \$36.90 per month.

Staff recommended the loan being contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage.

Jeff McCormick, SPN, discussed the project.

Motion by Becker, seconded by Lanning, to adopt **Resolution No. 2025-03** approving a Clean Water State Revolving Fund loan up to a maximum committed amount of \$425,000 at 3.75 percent interest for 30 years to the **city of Wagner** to replace sewer infrastructure along SD Highway 46, and authorizing the execution of the loan agreement, the acceptance of the Local Obligation, the assignment of the Local Obligation to the Trustee, and the execution and delivery of such other documents and the performance of all acts necessary to effectuate the loan approved in accordance with all terms as set forth in the Indenture of Trust, contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage. The motion carried unanimously.

Wolsey requested additional funding to replace the sanitary sewer line that leads to the lagoon. This project was originally provided funding in March 2023. The additional funds are being requested due to bids coming in over budget.

Wolsey proposes to replace approximately 1,480 linear feet of 15-inch sanitary sewer line with manhole inlets that lead to the lagoon. The current line has outlived its useful life and does not have any manholes to assist in flushing out the line.

The estimated project amount is \$500,000, and the amount requested is \$244,000. Other funding for the project includes \$72,000 in local cash, a \$50,000 grant from the James River Water Development District, and a \$134,000 Clean Water SRF loan.

Staff recommended awarding a \$244,000 Clean Water SRF loan at 3.75 percent interest for 30 years.

The city pledged a project surcharge for repayment of the loan. Wolsey has a flat rate of \$33.95 per month. Staff analysis indicates a surcharge of \$6.60 is needed for repayment of the loan, bringing rates to \$40.55 per month.

Staff recommended the loan being contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage.

Ted Dickey, NECOG, discussed the project.

Motion by Drewes, seconded by Bernhard, to adopt **Resolution No. 2025-04** approving a Clean Water State Revolving Fund loan up to a maximum committed amount of \$244,000 at 3.75 percent interest for 30 years to the **city of Wolsey** to replace the sanitary sewer line that leads to the lagoon, and authorizing the execution of the loan agreement, the acceptance of the Local Obligation, the assignment of the Local Obligation to the Trustee, and the execution and delivery of such other documents and the performance of all acts necessary to effectuate the loan approved in accordance with all terms as set forth in the Indenture of Trust, contingent upon the borrower adopting a bond resolution and the resolution becoming effective and contingent upon the borrower establishing a surcharge at a level sufficient to provide the required debt coverage. The motion carried unanimously.

Ms. McFarling provided a recap of available funds.

FFY 2024 CLEAN WATER SRF ANNUAL REPORT: Holly Briggs presented the FFY 2024 Clean Water SRF annual report.

The South Dakota Conservancy District is required to submit an annual report to the Environmental Protection Agency for the Clean Water State Revolving Fund (SRF). The Federal Fiscal Year 2024 report follows the same format as previous years and discusses activity from October 1, 2023, to September 30, 2024.

In FFY 2024 the board awarded 35 Clean Water SRF loans totaling \$221,286,847. Eight of the loans received principal forgiveness in the aggregate amount of \$1,603,200. Loan repayments for the year totaled \$41,400,000, with \$32,600,000 in principle, \$6,400,000 in interest, and \$2,300,000 in administrative surcharge.

Staff recommended that the board approve the draft annual report for the Clean Water SRF program and authorize staff to finalize and distribute the report.

Motion by Lanning, seconded by Bernhard, to approve the FFY 2024 Clean Water SRF program annual report and authorize staff to finalize and distribute the report. The motion carried unanimously.

FFY 2024 DRINKING WATER SRF ANNUAL REPORT: Megan Briggs presented the FFY 2024 Drinking Water SRF annual report.

The South Dakota Conservancy District is required to submit an annual report to the Environmental Protection Agency for the Drinking Water State Revolving Fund (SRF). The Federal Fiscal Year 2024 report follows the same format as previous years and discusses activity from October 1, 2023, to September 30, 2024.

In FFY 2024 the board awarded 33 Drinking Water SRF loans and approved two loan amendments for total amount of \$112,573,039. Eight of those loans received principal forgiveness in the aggregate total of \$\$20,511,000. Loan repayments totaled just over \$18,500,000, with \$12,600,000 in principle, \$4,700,000 in interest, and \$1,200,000 in administrative surcharge.

Staff recommended that the board approve the draft annual report for the Drinking Water SRF program and authorize staff to finalize and distribute the report.

Motion by Jones, seconded by Lanning, to approve the FFY 2024 Drinking Water SRF program annual report and authorize staff to finalize and distribute the report. Motion carried unanimously.

CENTRAL CITY REQUEST TO DEOBLIGATE CONSOLIDATED LOAN 225L-201: Ms. McFarling reported that on June 27, 2024, the Board of Water and Natural Resources awarded a \$182,000 Consolidated Water Facilities Construction Program Loan to Central City.

On November 25, 2024, DANR staff received a letter from Central City requesting to deobligate the loan.

Staff recommended the board rescind the loan.

Motion by Becker, seconded by Jennings, to rescind Resolution No. 2024-119, which awarded Consolidated Water Facilities Construction Program loan 2025L-201 in the amount of \$182,000 to the city of Central City. The motion carried unanimously.

EDGEMONT REQUEST TO DEOBLIGATE DRINKING WATER SRF LOAN C462216-03: Ms. McFarling reported that on January 7, 2021, the Board of Water and Natural Resources awarded a \$637,000 SRF loan to the city of Edgemont for an Iron Removal System installation project.

On November 5, 2024, DANR staff received email communications from the Mayor of Edgemont stating that the city will not be moving forward with the project and is requesting to deobligate the drinking water SRF loan.

Staff recommended the board rescind Resolution No. 2021-01, which awarded the loan.

Motion by Jennings, seconded by Lanning, to rescind Resolution No. 2021-01, which awarded Drinking Water SRF Loan C462216-03 in the amount of \$637,000 to the city of Edgemont. The motion carried unanimously.

GRANT-ROBERTS RURAL WATER SYSTEM DRINKING WATER SRF LOAN C462475-03:
Ms. McFarling reported that on June 27, 2024, the Board of Water and Natural Resources awarded a \$2,549,000 Drinking Water SRF loan with principal forgiveness of 24.3 percent not to exceed \$619,000 to Grant Roberts Rural Water System for the 2024 System Improvement Project.

On December 2, 2024, DANR received a letter from Grant-Roberts Rural Water System requesting a decrease of the initial \$2,549,000 loan awarded. This decrease brings the total loan to \$1,687,000. The rural water system also wished to retain the \$619,000 in principal forgiveness, which will assist in connecting the town of Marvin to the system and allow those users to join with no additional debt charge. With the decrease in the total loan to \$1,687,000, the principal forgiveness percentage amount will increase to 36.7 percent.

Staff recommended the board rescind Resolution No. 2024-119, which awarded the SRF loan, and adopt a resolution awarding a \$1,687,000 Drinking Water SRF loan at 3.75 percent for 30 years with 36.7 percent principal forgiveness, not to exceed \$619,000.

Ms. McFarling answered questions from the board.

Motion by Jones, seconded by Lanning to rescind Resolution No. 2024-119, which awarded the SRF loan, and to adopt **Resolution No. 2025-05** awarding a \$1,687,000 Drinking Water SRF loan at 3.75 percent for 30 years with 36.7 percent principal forgiveness, not to exceed \$619,000 to **Grant-Roberts Rural Water System**. The motion carried unanimously.

AMENDMENT TO MID-DAKOTA RURAL WATER SYSTEM DRINKING WATER SRF LOAN C462430-07: Holly Briggs reported that on June 27, 2024, the Board of Water and Natural Resources awarded a \$14,730,000 Drinking Water SRF loan to Mid-Dakota Rural Water System for the Wessington Springs Bulk Water Supply project.

When corresponding with the borrower's attorney, it was brought to staff's attention that the resolution format only listed the principal forgiveness in the contingency portion of the resolution and was not in the correct format that allowed the loan for 100 percent principal forgiveness

Staff recommended the board rescind Resolution No. 2024-113, which awarded the original Drinking Water SRF with only a contingency of principal forgiveness and adopt a new resolution with the correct format for 100 percent principal forgiveness.

Motion by Drewes, seconded by Becker, to rescind Resolution No. 2024-113, and to adopt **Resolution No. 2025-06** awarding a Drinking Water SRF loan to **Mid-Dakota Rural Water System** with the correct format to allow for 100 percent principal forgiveness. The motion carried unanimously.

NEXT MEETING: The next meeting is March 27, 2025, at the Matthew Training Center in Pierre.

Ms. McFarling discussed possible agenda items for the March board meeting.

ADJOURN: Motion by Jones, seconded by Drewes, to adjourn. The motion carried unanimously.

Approved this 27th day of March 2025.

Item 5

TITLE: Fort Pierre Request to Deobligate Drinking Water SRF Loan C462049-01 and C462049-02

EXPLANATION: On September 29, 2022 the Board of Water and Natural Resources awarded Fort Pierre a \$4,230,684 SRF loan for its Water Storage Tank project and on September 26, 2024 the Board of Water and Natural Resources awarded Fort Pierre a \$2,470,434 SRF loan for its Water Storage Tank project.

On January 13, 2025, DANR staff received a letter from the city of Fort Pierre, stating that Fort Pierre will not be utilizing the SRF loan funds correlating to the Water Storage Tank project and request to deobligate both the \$4,230,684 and \$2,470,434 Drinking Water SRF loans.

RECOMMENDED ACTION: Rescind Resolution #2022-427 and #2024-139 which awarded the Drinking Water SRF loans for the project.

CONTACT: Holly Briggs, 773-6110

CITY OF FORT PIERRE

January 13, 2025

SD Department of Ag & Natural Resources
523 E Capitol Ave
Pierre, SD 57501

To Whom It May Concern,

At their January 6, 2025 meeting, the Fort Pierre City Council took action to not utilize SRF loan funds that have been awarded to us due to the decision to not move forward with our complete water storage project. Therefore, we are requesting the \$4,230,684 DWSRF-01 awarded in September 2022 and the additional \$2,470,434 DWSRF-02 awarded in September 2024 both be de-obligated.

The City of Fort Pierre is very appreciative of your continued support to our projects and the time dedicated to these funding opportunities. Please contact us if you need any additional information or have any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Roxanne Heezen", is written over a light blue horizontal line.

March 27, 2025

Item 6

TITLE: Amendment to Mid-Dakota Rural Water System Drinking Water SRF Loan (C462430-07) Resolution

EXPLANATION: On June 27, 2024, the Board of Water and Natural Resources awarded the Mid-Dakota Rural Water System a \$14,730,000 Drinking Water SRF loan for its Wessington Springs Bulk Water Supply project.

When corresponding with the Borrower's attorney it was brought to our attention that the resolution format only listed in the principal forgiveness in the contingency portion of the Resolution and was not in the correct format that allowed the loan for 100% principal forgiveness.

On January 9, 2025, the Board of Water and Natural Resources awarded the Mid-Dakota Rural Watery System a \$14,730,000 Drinking Water SRF loan with 100% principal forgiveness for its Wessington Springs Bulk Water Supply project.

It was later brought to our attention that resolution 2025-06 awarded on January 9, 2025, contained technical inaccuracies related to the structure of the Borrower, the security for the loan, and the debt position of the loan.

RECOMMENDED ACTION: Staff recommendation to the board is to rescind Resolution #2025-06 which amended the original Drinking Water SRF, and award a new correct resolution to approve the loan. The loan would be contingent on the Applicant Resolution becoming effective following its publication, the borrower approving and executing a Promissory Note, and the receipt of the 2023 and 2024 Drinking Water State Revolving Fund Emerging Contaminants capitalization grant from EPA.

CONTACT: Andy Bruels, 773-4805

March 27, 2025

Item 7

TITLE: Amendments to State Water Plan and 2025 Clean Water State Revolving Fund and 2025 Drinking Water State Revolving Fund Intended Use Plans

EXPLANATION: Water projects which will require state funding or need state support for categorical grant or loan funding need to be on the State Water Plan. The Board of Water and Natural Resources annually approves projects for placement onto State Water Facilities Plan and provides for amendment of projects onto the plan. Placement of a project on the State Water Plan by the board provides no guarantee of funding. The projects placed onto the plan at this meeting will remain on the facilities plan through December 2026.

Projects seeking a Clean Water or Drinking Water State Revolving Fund loan must be included on the project priority list of the Intended Use Plan. The State Water Plan applications are used to determine which projects should be amended onto the State Revolving Fund Project Priority Lists.

The following is the list of State Water Plan applications received by the February 1, 2025, deadline.

- a) Carriage Hills Water Association
- b) Henry
- c) North Sioux City
- d) Rapid City
- e) Salem – Water Treatment
- f) Salem – Water Source
- g) Wessington

Clean Water SRF Amendments

Staff is recommending that the following projects be amended onto the 2025 Clean Water State Revolving Fund Project Priority List:

Priority Points	Loan Recipient	Estimated Loan Amount	Expected Loan Rate & Term
13	Bison	\$370,000	3.75%, 30 years
10	North Sioux City	\$5,144,180	3.75%, 30 years
8	Wessington	\$3,618,011	3.75%, 30 years

March 27, 2025

Item 7

Drinking Water SRF Amendments

Staff is recommending that the following project be amended onto the 2025 Drinking Water State Revolving Fund Project Priority List:

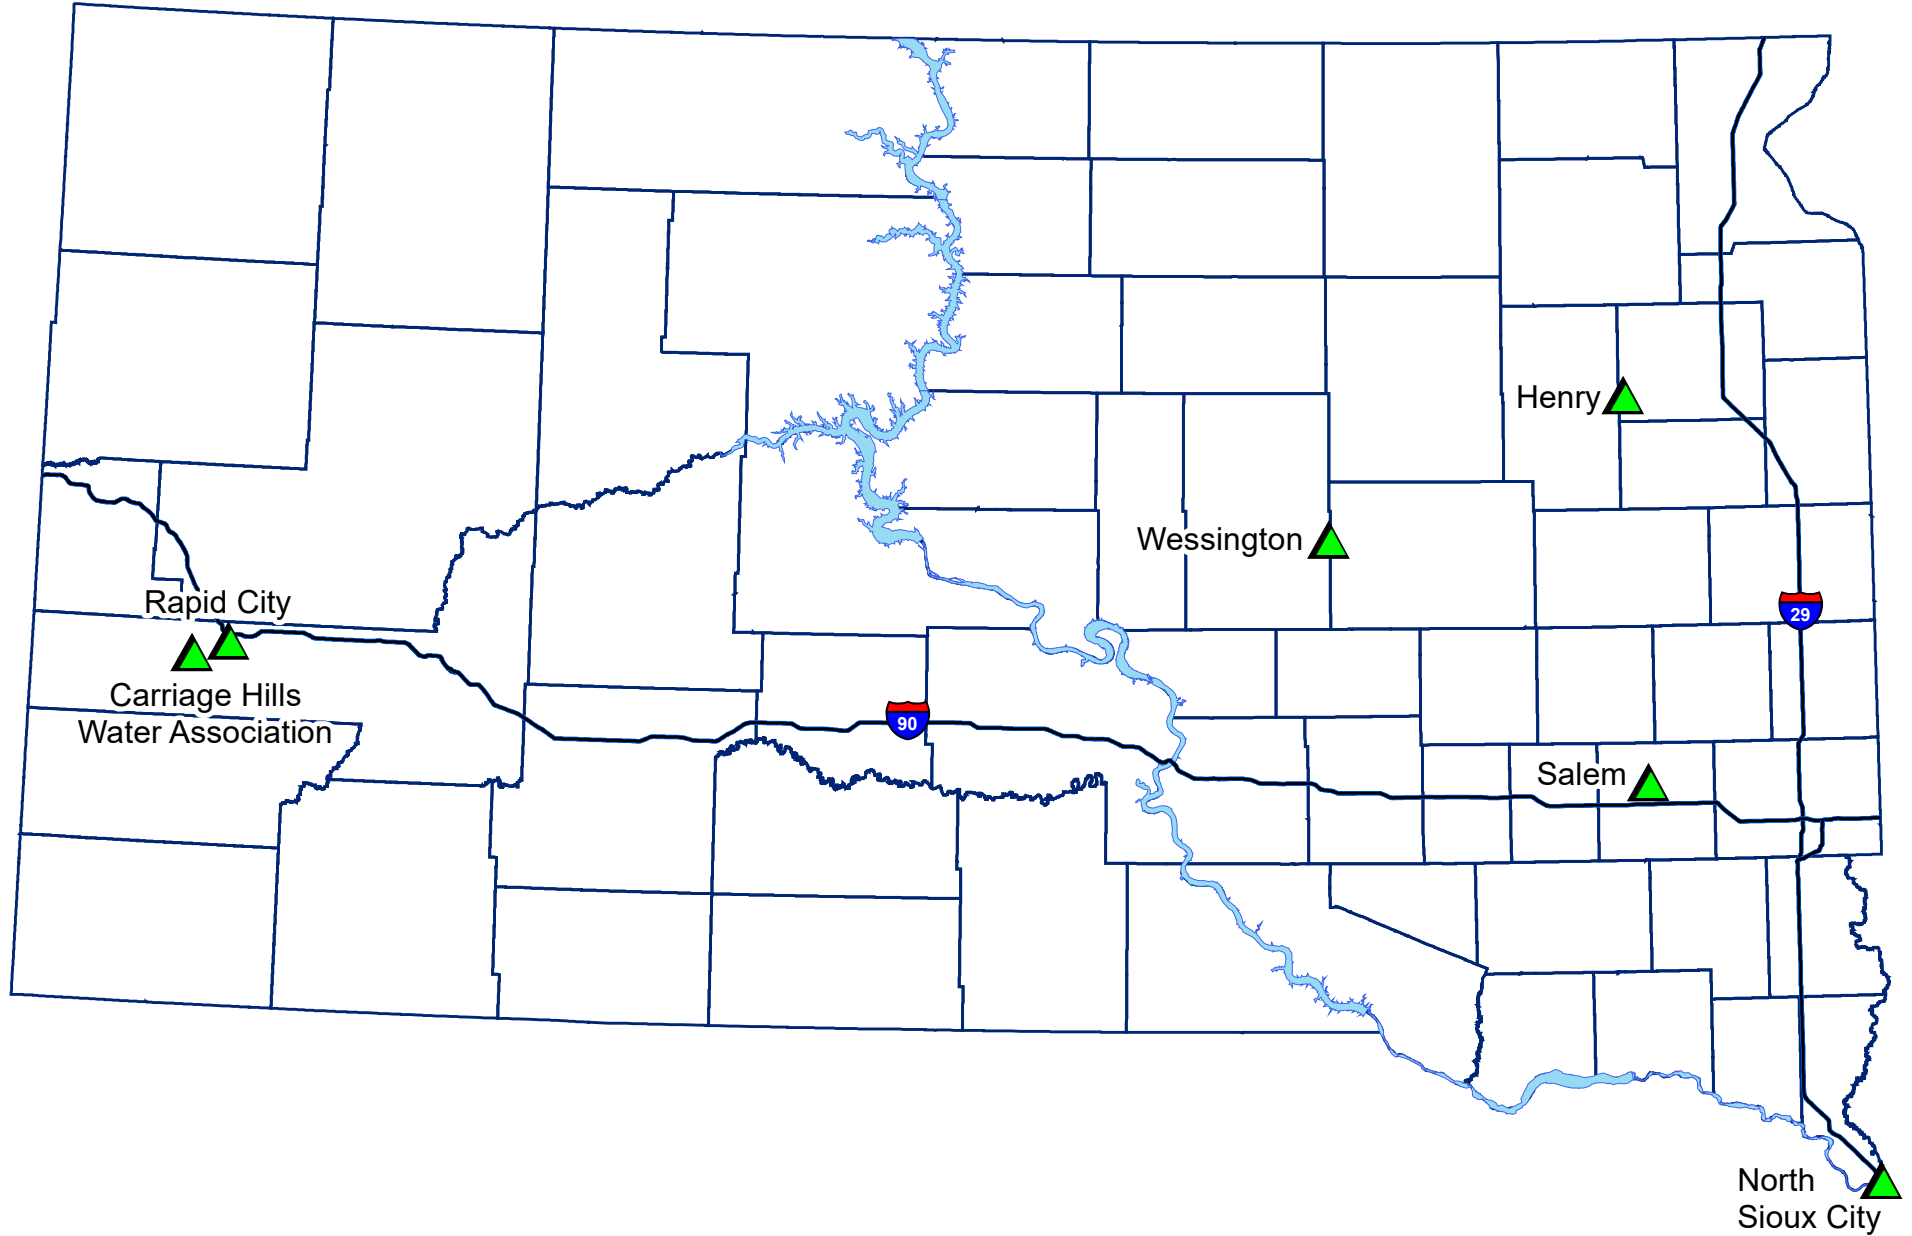

Priority Points	Loan Recipient	Estimated Loan Amount	Expected Loan Rate & Term
153	Carriage Hills Water Association	\$7,600,000	4.75%, 30 years
130	Salem	\$6,270,000	3.50%, 30 years
123	Henry	\$4,075,170	3.00%, 30 years
95	Salem	\$2,100,000	3.50%, 30 years
85	Rapid City	\$19,173,000	3.50%, 30 years

RECOMMENDED ACTION: Approve amendment of projects onto the State Water Plan and 2025 Clean Water State Revolving Fund and 2025 Drinking Water State Revolving Fund Intended Use Plans

CONTACT: Andy Bruels, 773-4216

State Water Plan Application

Applicant: Carriage Hills Water Association Address: 4050 Carriage Hills Drive Rapid City, South Dakota 57702	Proposed Funding Package Projected State Funding <u>\$7,600,000</u> Local Cash _____ Other: _____ Other: _____ TOTAL <u>\$7,600,000</u>
---	---

Project Title: Carriage Hills Water Line Replacement Project & Consolidation with Rapid City

Description: (Include present monthly utility rate.)

Carriage Hills Water Association is proposing to rehabilitate their water distribution system to meet design standards required by the City of Rapid City and then plan to consolidate into the City of Rapid City's drinking water system. Benefits of consolidation will include having capacity for fire flow, increased storage, and Carriage Hills Water Association no longer having to maintain the system.

The City's design standards with require all watermains be a minimum of 8-inch in diameter, fire hydrants be added, and water main looping as allowed by terrain. A booster pump will need to be constructed between Parkridge Place and Penrose Place creating two different pressure zones in the subdivision and pressure reducing valves where needed. Any costs of improvements required by Rapid City to meet design standards that exceed the cost of replacing lines, will be covered by Rapid City.

Current rates per 7,000 gallons are \$72.00 per month.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Charles Abeiter, Board President

 Date

Additional Comments:

Water rate expected as a result of the project if the funding is entirely loan (question #2 above) was calculated using the following:

\$5,800,000 loan @ 4.75% interest for 30 years (if 30 years is allowed) with 110% debt coverage results in a monthly payment of \$33,281.11. With 116 users on the system, this would result in a monthly surcharge of \$286.91/month for each water user. $\$72 + \$286.91 = \$358.91$ per month per user.

\$7,600,000 loan @ 4.75% interest for 30 years (if 30 years is allowed) with 110% debt coverage results in a monthly payment of \$43,609.72. With 116 users on the system, this would result in a monthly surcharge of \$375.95/month for each water user. $\$72 + \$375.95 = \$447.95$ per month per user.

The Carriage Hills Water Association is seeking funding for a critical infrastructure project with an estimated total cost of \$7,600,000. This project involves connecting the association to the City of Rapid City's water system and upgrading the existing distribution system, including water mains and appurtenances, to meet city standards. Additionally, the City of Rapid City will assume operational and maintenance responsibilities for the system once upgrades are completed.

The core infrastructure improvements specific to the Carriage Hills Water Association amount to \$5,800,000. However, the need for compliance with city standards adds an additional \$1,800,000 to the total project cost totaling \$7,600,000.

State Water Plan Application

Applicant: Town of Henry	Proposed Funding Package
Address: 210 Main St. Henry, SD 57243	Projected State Funding <u>\$4,075,170</u>
Phone Number:	Local Cash _____
	Other: _____
	Other: _____
	TOTAL <u>\$4,075,170</u>

Project Title: Water System Improvements Phase 2 & 3

Description: (Include present monthly utility rate.)

The city is proposing to construct improvements to the water system. The project will replace and install approximately 7,100 LF of cast iron water main with six inch PVC pipe, install 11 hydrants, install approximately 1,200 LF of service lines, install 2,000 Ft of 3" PVC Watermain, install 60,000 gallon ground storage tank with booster pump station, reconnect customer services for 44 connections, valves, street repairs, plus any other necessary appurtenances to complete the project. According to the engineering report, the town's existing water distribution system consists of mainly cast iron pipes with some PVC water lines. The cast iron pipe are getting brittle which is causing cracks and breaks in the water lines that create a potential for contamination to enter the water distribution system and result in lost water. The system is mostly dead-end lines with little looping. Dead-end lines allow a longer water retention time in the pipe that can be detrimental to water quality and a health hazard. The Town currently has no water storage.

Current residential water rates are \$50.25 per customer per month for 5,000 gallons usage.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Sioux Laundry Lift Station Replacement Project

Description: (Include present monthly utility rate.)

The City of North Sioux City is planning to replace an existing lift station that serves an industrial park that is at capacity. The new lift station will include additional pumping capacity, and larger wet well. Additionally, approximately 1,750 of sanitary sewer gravity line will be upsized from an 8" to 12" diameter pipe and 2,000 feet of 6-inch forcemain will be upsized to a 10-inch diameter forcemain.

The City's current wastewater rates are \$62.11 for a 5,000 gallon user.

Project Title: City of Rapid City- Municipal Well Development and Improvements

Description: (Include present monthly utility rate.)

City of Rapid City is proposing improvements to several of its municipal wells. While all three projects are being placed on the State Water Plan together, the City plans to pursue funding for these projects separately. Project 1- Well #4 Improvements: Install new well pump and motor, drop pipe, pitless adapter and construct a new well house on site for Well #4 due to current well site being very confined and not conducive to the construction of a new well (\$3,932,000). Project 2- Well #13 Improvements: Install a new pump and motor into the existing Well #13 with larger casing pipe and connected to existing 16-inch water transmission line. A well house will be constructed on site after the new well has been drilled (\$7,649,000). Project 3- Well #14 New Well Construction: Acquire land and construct a new well, Well #14 on this site which will include land clearing and grading to level the site, drilling a new well, installing a well pump and motor, pitless adapter unit, well house and pipeline construction (\$7,592,000).

City of Rapid City's 2025 rate for residential users is per 5,000 gallons is \$51.81 per month for single-family residential users with a meter size of 3/4 inch or less. Rates increase for larger meter sizes and type of user. CORC has already approved a graduated fee schedule where rates will increase annually 2025-2028, with the rate per 5,000 gallons in 2028 being \$68.93/month for single-family residential users with a 3/4 inch or less meter size.

The Applicant Certifies That:

Additional Comments:

Water rate expected as a result of the project if the funding is entirely loan (question #2 above) was calculated using the following:

\$19,173,000 loan @ 3.75% interest for 30 years (if 30 years is allowed) with 110% debt coverage results in a monthly payment of \$97,672.47. With 24,945 users on the system, this would result in a monthly surcharge of \$3.92/month for each water user. $\$51.81 + \$3.92 = \$55.73$ per month per user if the project is bonded by surcharge and the rates are enacted in 2025. However, Rapid City has already adopted a fee schedule that will increase water rates each year from 2025-2028, with the rates being 68.93/month for customers with a 3/4 in meter or less in 2028. Please see attached rate schedule for further details.

\$19,173,000 loan @ 3.5% interest for 20 years (if 20 years is allowed) with 110% debt coverage results in a monthly payment of \$122,315.25. With 24,945 users on the system, this would result in a monthly surcharge of \$4.90/month for each water user. $\$51.81 + \$4.90 = \$56.71$ per month per user.

Project Title: Water Treatment Improvements

Description: (Include present monthly utility rate.)

The water treatment plant is nearing the end of its useful life and is in need of improvements to address current challenges that are experienced. Proposed improvements include adding a well flush-to-waste system upstream of the pretreatment equipment. This will enable Salem to flush the wells to waste during startup, reducing the amount of oxidized iron and manganese reaching the pretreatment equipment and, ultimately, the NF/RO membranes. Proposed improvements also include demolishing the old and abandoned UF membrane equipment and ancillary feed and filtrate tanks to provide the necessary space for improvements. Additionally, modifications to the chemical feed, electrical, and control systems will be necessary. Replacing the existing NF/RO equipment with two NF/RO skids, with one skid will consist of a train capable of producing 50% of the required permeate flow, will allow for operation during periods of low demand, and provides redundancy if one train is unavailable.

Currently Monthly Water Rate for 5,000 gallon residential usage: \$86.19

The Applicant Certifies That:

Project Title: Water Source Improvements

Description: (Include present monthly utility rate.)

Proposed improvements include adding additional water source well(s) to supplement current wells which are in production. Proposed wells will increase well spacing to reduce drawdown effects and ultimately replace wells that are currently in operation and nearing the end of their useful life. Proposed improvements also include adding monitoring equipment at each well site, including flow meters and level transducers. These improvements will allow operation and pumping from each well within recommended rates, increasing the water column over the submersible pumps and reducing the amount of oxidized iron and manganese reaching the NF/RO membranes.

Currently Monthly Water Rate for 5,000 gallon residential usage: \$86.19

The Applicant Certifies That:

Item 8

TITLE: Dakota Mainstem Regional Water System State Water Resources Management System Grant Agreement Amendment

EXPLANATION: Section 2 of Senate Bill 16 approved by the 2024 Legislature appropriated \$1,000,000 in grant funds for the Dakota Mainstem Regional Water System study. The board placed these funds under agreement with the Western Dakota Regional Water System in March 2023.

The 2025 State Legislature appropriated an additional \$1,000,000 in grant funds for the Western Dakota Regional Water System study in Section 1 of Senate Bill 33.

Dakota Mainstem Regional Water System is a recently formed entity, members include municipalities, rural water systems, water associations, water districts, tribal systems, and others. Final membership has not been set and canvassing of interested members is currently ongoing. The purpose is to conduct a feasibility study to determine the viability and costs to provide water and system interconnects throughout east central and southeastern South Dakota to assure water availability to meet current user needs and provide for future growth.

The department has received a request from the Dakota Mainstem Regional Water System, as the local project sponsor to place the additional 2025 \$1,000,000 appropriation under agreement. The first amendment to the grant agreement has been drafted with the assistance of DANR legal counsel, and the DANR review process has been completed.

RECOMMENDED ACTION: Approve the resolution authorizing the Chairman to execute the State Water Resources Management System Grant Agreement First Amendment with the Dakota Mainstem Regional Water System.

DAKOTA MAINSTEM

REGIONAL WATER SYSTEM

March 7, 2025

Mr. Andy Bruels, P.E.
Division Director
Division of Financial and Technical Assistance
South Dakota Department of Agriculture and Natural Resources
523 East Capitol Avenue
Pierre, SD 57501

Re: Dakota Mainstem Regional Water System, Inc.

Dear Mr. Bruels:

As President and on behalf of Dakota Mainstem Regional Water System, Inc., I hereby request the 2025 legislative appropriation of \$1,000,000 in grant funds be placed under contract at the upcoming Board of Water and Natural Resources meeting.

Dakota Mainstem plans to use the funds for administrative expenses and to continue our work to better understand the current water needs of central and southeastern South Dakota through the completion of an appraisal study. Upon completing the appraisal study and selecting a preferred alternative, Dakota Mainstem intends to proceed with a feasibility study.

Dakota Mainstem continues to receive support and encouragement from municipalities, rural water systems, and local government entities in the region, including counties and water development districts. This support has been demonstrated by, among other things, multiple contributions to our efforts, both monetary and in-kind, and the involvement of their elected and administrative leadership in the organization and governance of Dakota Mainstem.

If you have any questions, please do not hesitate to contact me or our Executive Director, Kurt Pfeifle.
Sincerely,

DAKOTA MAINSTEM REGIONAL WATER SYSTEM, INC.

Ryan Johnson, PE
President

**DAKOTA MAINSTEM REGIONAL WATER SYSTEM
RESOLUTION NO. 2025-001**

**RESOLUTION AUTHORIZING A REQUEST FOR FINANCIAL ASSISTANCE AS PROVIDED
FOR IN THE 2025 SOUTH DAKOTA LEGISLATURE WATER OMNIBUS, AUTHORIZING
THE SUBMITTAL OF THE REQUEST, AND DESIGNATING AN AUTHORIZED
REPRESENTATIVE TO CERTIFY AND SIGN PAYMENT REQUESTS**

WHEREAS, the Dakota Mainstem Regional Water System (DMRWS) has determined it is necessary to prepare an appraisal study, feasibility study, a facilities plan, and preliminary design for the construction of a drinking water expansion project from the Missouri River to serve communities throughout South Dakota and into neighboring states Minnesota, Iowa, and Nebraska (Project); and

WHEREAS, the DMRWS requests of the South Dakota Board of Water and Natural Resources the sum of **\$1,000,000**, appropriated by the 2025 Legislature, as a grant through the State Water Resources Management System (SWRMS); and

WHEREAS, it is necessary to designate an authorized representative to execute and submit all required documents on behalf of DMRWS and to certify and sign payment requests in the event financial assistance is awarded for the Project;

NOW, THEREFORE, BE IT RESOLVED by the DMRWS as follows:

1. The Request for Funding

DMRWS board of directors hereby approves the request to the South Dakota Board of Water and Natural Resources for the **\$1,000,000** for the Project, which was appropriated by the 2025 South Dakota Legislature.

2. Authorization to Transmit Documents

The President or Treasurer of the Board is hereby authorized to transmit this resolution to the South Dakota Board of Water and Natural Resources and to execute and deliver such other documents and perform all acts necessary to effectuate the receipt of funds.

3. Designation of Authorized Representative

The President or Treasurer of the Board is hereby designated as the authorized representative of the DMRWS to do all things on its behalf to certify and sign payment requests in the event financial assistance is awarded for the Project. The President or Treasurer of the board may perform the designated duties through the Executive Director.

Adopted this 7th day of March 2025.

DAKOTA MAINSTEM REGIONAL WATER SYSTEM, INC.

President

Item 9

TITLE: Water Investment in Northern South Dakota (WINS) State Water Resources Management System Grant Agreement Amendment

EXPLANATION: Section 4 of Senate Bill 17 as approved by the 2023 Legislature appropriated \$5,000,000 in grant funds and Section 3 of Senate Bill 16 as approved by the 2024 Legislature appropriated \$5,000,000 in grant funds for the Water Investment in Northern South Dakota (WINS) project. The board placed these funds under agreement with the WINS project sponsors in March 2023 and amended in March 2024.

The 2025 State Legislature appropriated an additional \$2,000,000 in grant funds for the WINS project in Section 2 of Senate Bill 33.

The Water Investment in Northern South Dakota (WINS) project is a collaborative effort between WEB Water, the city of Aberdeen, and BDM Rural Water. The project will provide 42.1 MGD of treated drinking water to the northeast South Dakota region through the three systems. The proposed project consists of a raw water intake, water treatment facility, three storage reservoirs, five pump or control facilities, a pressure reducing facility, and 148 miles of pipeline ranging in size from 20-inch to 54-inch.

The department has received a joint request from the three project sponsors to place the additional 2025 \$2,000,000 appropriation under agreement. The second amendment to the grant agreement has been drafted with the assistance of DANR legal counsel, and the DANR review process has been completed.

RECOMMENDED ACTION: Approve the resolution authorizing the Chairman to execute the State Water Resources Management System Grant Agreement Second Amendment with the joint project sponsors.

RE: Legislative Appropriation of Grant Funds

Dear Mr. Bruels:

On behalf of the Water Investment in Northern South Dakota (WINS) team, we respectfully request to have the WINS legislative appropriation of \$2,000,000 million in grant funds to be under contract at the Board of Water and Natural Resources (BWNR) next meeting.

We plan to use the funds for the continued engineering design, pre-construction activities, and construction of facilities included in the WINS project.

The support and assistance the WINS project continues to receive from the BWNR and the DANR are greatly appreciated. Please feel free to contact any of us with any questions or requests for further information.

On Behalf of WINS,

Shane Phillips, General Mgr.
WEB Water Development

Robin Bobzien, City Manager
Aberdeen, South Dakota

Rod Kappes, General Mgr.
BDM Rural Water System

RESOLUTION NO. 25-03-01R

RESOLUTION DESIGNATING CERTIFYING OFFICER TO EXECUTE DOCUMENTS NECESSARY TO SECURE SWRMS GRANT FUNDING FOR WINS PROJECT

WHEREAS, the water supply project known as “Water Investment in Northern South Dakota” (WINS), a joint project of WEB Water Development Association (WEB), City of Aberdeen, SD (Aberdeen), and BDM Rural Water Systems, Inc. (BDM), has been placed on the State Water Plan; and

WHEREAS, WINS proposes to accept a grant of \$2,000,000 of State Water Resources Management System (SWRMS) money to be used as a portion of the local share matching federal funds for the same project. The grant will be supplemented with funds from the parties’ contributions to make up the local share as well as other sources of funds; and

WHEREAS, WINS is required to designate certifying officers for the purpose of signing required documents pertaining to this grant; and

WHEREAS, the WINS sponsors agree that the governing body of each WINS partner shall designate its certifying officer and authorize such officer to execute all documents necessary to secure the SWRMS grant and funds.

NOW, THEREFORE, BE IT RESOLVED, the City Council hereby authorizes the City Manager to execute and submit the letter requesting placement of the SWRMS funds under agreement for the proposed project on behalf of the City of Aberdeen for WINS; and,

BE IT FURTHER RESOLVED, the City Manager is hereby designated as the certifying officer for the City of Aberdeen for WINS for the purpose of executing the SWRMS grant agreement, contract, correspondence, and other required documents for this grant and is also designated as the certifying officer for the purpose of signing pay requests and other financial documents for this grant.

The foregoing Resolution was considered at a regular meeting of the Aberdeen City Council on the 3rd day of March, 2025, and upon Roll Call vote the Resolution was adopted.

Number of AYES: 9
Number of NAYS: 0
Members abstaining: None

Travis Schaunaman, Mayor

ATTEST:

Jordan McQuillen, Finance Officer

**RESOLUTION DESIGNATING CERTIFYING OFFICER TO EXECUTE
DOCUMENTS NECESSARY TO SECURE ADDITIONAL SWRMS GRANT
FUNDING FOR WINS PROJECT**

WHEREAS, the water supply project know as "Water Investment in Northern South Dakota" (WINS), a joint project between WEB Water Development Association (WEB), City of Aberdeen, SD (Aberdeen), and B.M.D. Rural Water System, Inc. (BDM), has been placed on the State Water Plan; and

WHEREAS, WINS proposes to accept an additional grant of \$2,000,000 of State Water Resources Management System (SWRMS) money to be used for the engineering design, preconstruction activities and construction of the facilities included in the Water Investment in Northern South Dakota project; and

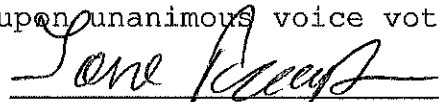

WHEREAS, WINS is required to designate certifying officers for the purposes of signing required documents pertaining to this grant; and

WHEREAS, the WINS sponsors agree that the governing body of each WINS partner shall designate its certifying officer and authorize such officer to execute all documents necessary to secure the SWRMS grant and funds.

NOW, THEREFORE, BE IT RESOLVED, the B.D.M. Rural Water System, Inc. Board of Directors hereby authorizes the General Manager Rodney D. Kappes to execute and submit the letter requesting placement of the SWRMS funds under agreement for the proposed joint project on behalf of BDM Rural Water System, Inc. for WINS; and,

BE IT FURTHER RESOLVED, the General Manager Rodney D. Kappes is hereby designated as the certifying office for the BDM Rural Water System, Inc. for WINS for the purpose of executing SWRMS grant agreement, contract, correspondence, and other required documents for this grant and is also designated as the certifying officer for the purpose of signing pay requests and other financial documents for this grant.

The foregoing Resolution was considered at a regular meeting on the 24th day of February, 2025 and upon unanimous voice vote the Resolution was adopted.

Torre Raap, Chairman

ATTEST:

Danny R. Smeins, Acting Secretary

**WEB WATER DEVELOPMENT ASSOCIATION, INC
BOARD OF DIRECTORS**

**RESOLUTION DESIGNATING CERTIFYING OFFICER
TO EXECUTE SWRMS GRANT FUNDING DOCUMENTS
FOR THE WINS PROJECT**

The water supply project known as "Water Investment in Northern South Dakota" (WINS), a joint project of WEB Water Development Association (WEB), City of Aberdeen, SD (Aberdeen), and BDM Rural Water Systems, Inc. (BDM), (WEB, Aberdeen, and BDM each a "Sponsor") has been placed on the State Water Plan; and

WINS proposes to accept a \$2,000,000 State Water Resources Management System (SWRMS) grant to be used as a portion of the local share matching federal funds for WINS. The grant will be supplemented with funds from the Sponsors' contributions to make up the local share as well as other sources of funds; and

WINS is required to designate certifying officers for the purpose of signing required documents pertaining to this grant; and

The Sponsors agree that each of their governing bodies will designate a certifying officer and authorize such officer to execute all documents necessary to secure the SWRMS grant and funds.

Therefore, the WEB Board of Directors hereby authorizes its General Manager to execute and submit the letter requesting placement of the SWRMS funds under agreement for the WINS project on behalf of WEB; and,

The General Manager is hereby designated as WEB's certifying officer for WINS for the purpose of executing the SWRMS grant agreement, contract, correspondence, and other required documents for this grant and is also designated as the certifying officer for the purpose of signing pay requests and other financial documents for this grant.

The WEB Board of Directors adopted the foregoing Resolution on February 20th, 2025.

Project Title: **Service to the Town of Summit**

Description:

The proposed project for Grant-Roberts Rural Water System consists of providing water service to the Town of Summit. Summit's water supply has poor water quality and is generally unreliable. The Town of Summit experiences high levels of iron and manganese in their water, and they currently have no way to cost effectively improve the quality of their water. Grant-Roberts is proposing connect the town as a bulk customer.

Grant-Roberts system currently has 2,000 total system users split into multiple user rate classes serving an estimated population of approximately 5,000. Individual rural system users experience \$64.70 per month average cost per 7,000 gallons. All system improvement projects proposed within this application will be paid from from the bulk water service fees with the Town of Summit.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: New Elevated Storage Reservoir and Distribution Line Replacement

Description:

Perkins County Rural Water System, Inc is proposing installation of a new elevated 300,000 gallon reservoir in the central part of the system and replacement of approximately 11,200 feet of pipeline to accommodate the increased system pressure during pump runs to fill the tank. The tank will be constructed at an elevation similar to the existing hydraulic grade line, which will allow the system to operate similarly to its current operations with limited pipeline upgrades being required. Additionally, replacement of approximately 19,000 feet of corroding and leaking existing ductile iron pipe is also required.

This project increases the system's efficiency and provides a reliable solution to consistently deliver potable water at adequate pressures to customers.

Perkins County Rural Water System's water rates are separated into 3 categories:

1. Residential water rate for 7,000 gallons is a base fee of \$65 plus \$62.65 for usage (\$8.95 per 1,000 gallons) for the total rate of \$127.65/month/user.
2. Pasture & Seasonal water rate for 7,000 gallons is a base fee of \$31.25 plus \$62.65 for usage (\$8.95 per 1,000 gallons) for the total rate of \$93.9/month/user
3. Municipal Bulk Contracted water rate for 7,000 gallons is \$140 for usage (\$20 per 1,000 gallons)

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: **Distribution System Upgrade**

Description:

The City is preparing to transition its water source from wells to Mid-Dakota Rural Water System. As part of these efforts the City needed improvements of its water infrastructure to facilitate a hook up to Mid-Dakota. This project was identified, engineered and funded for construction in 2025. In a rare occurrence the residents requested further improvements due to their desire for quality colorless water fully understanding a possible rate increase. The City is proposing to replace approximately 3,800 lineal feet of AC and cast pipe with a combination of 6" and 8" PVC water mains along with 1,300 feet of 1" and 2" service lines within the distribution system. These efforts will complete previous efforts to transition the distribution system to PVC pipe. Construction activities will occur throughout the community as noted in the attached illustration, Figure 5.1 Proposed Pipe for Alternative 2.

The City's consulting engineer, SPN Associates, has provided a detailed cost estimate for the proposed distribution system improvements. Please refer to the attached Facilities Plan and updated cost estimate from SPN.

The City's water rate for 5,000 gallons is \$55.40

Project Title: Phase 2- Cast Iron Pipe and 4-inch distribution line replacement

Description:

The Town of Buffalo Gap is proposing to replace the cast iron pipe and 4-inch drinking water mains throughout town. Buffalo Gap has already completed Phase 1 of the project; Phase 2 is necessary to finish the project. Phase 2 will continue to address all known system deficiencies related to the CIP and 4" mains. This project will further boost the water system flows and assist in the future integrity of the system. By making these improvements the Town will have the opportunity to buy bulk water from Fall River Water Users District in the future if so desired; however, without these improvements FRWUD is not willing to provide the Town water supply due to severe water loss caused by deficiencies in the lines.

The Town's current drinking water rates are \$57.00 per 5,000 gallons

The Applicant Certifies That:

Project Title: North Angostura Booster Station (previously called Maverick Jct. Booster Station)

Description:

Fall River Water User District is proposing a construction of a new booster station near the corner of Hwy's 18/79/385 and Angostura Road. The new booster station will allow emergency Cheyenne River crossing to be opened and utilized during normal operations. This will increase the flow capacity to the Angostura GSR and allow simultaneous operation of the new pump station, the South Madison Well, and the connection to Hot Springs. Additionally, if the Fairburn well is out of service, the proposed North Angostura Booster Station will be able to pump in the opposite direction (from Angostura) to fill the Buffalo Gap GSR. New booster station will also allow the existing Buffalo Gap control valve vault to be abandoned. ***In the facilities plan this project is referenced as Alternative #4- Maverick Junction Booster Station.

Fall River Water User District's current monthly water rate per 7,000 gallons is a base fee of \$53.50 plus \$26.25 (\$3.75 per 1,000 gallons) usage for a total rate of \$79.75

$(\$53.5 + 7 \times \$3.75 = \$79.75)$

The Applicant Certifies That:

<p>Applicant: Oak Mountain Country Estates HOA</p> <p>Address: PO BOX 63, Deadwood, SD 57732</p> <p>Subapplicant: Oak Mountain Water Distribution System Improvements - Phase 1</p> <p>Unique Entity ID: VE3AMW4R4BQ1</p>	<p>Proposed Funding Package</p> <p>Requested Funding <u>\$445,000</u></p> <p>Local Cash _____</p> <p>Other: _____</p> <p>Other: _____</p> <p>Other: _____</p> <p>TOTAL <u>\$445,000</u></p>
---	---

Project Title: Oak Mountain Water Distribution System Improvements - Phase 1

Description:

Oak Mountain Country Estates HOA operates a public water system 3-miles east of Deadwood. Oak mountain is proposing critical water distribution system improvements. Phase 1 suggests installing meter pits at the curb stops. The water district owns and operates the service lines to the curb stop. By adding a meter pit at this connection, the district would no longer be responsible for leaks that are occurring on private water lines. Starting with meter pit installation, the district could evaluate if removing the service line leaks from the equation helps rebalance the overall water loss results. If not, then the district could proceed to the next phase of distribution replacement. As a recommendation to identify locations of future water leaks on the mains, this alternative also looks at adding two 4-inch master meters at incremental distances along the main. These meters would help to narrow down the location of any existing or future water leaks along the main.

Water fee structure for 7,000 gallons is as follows:

\$80 water base rate + \$75 water maintenance fee + usage fee of \$39.3 (\$5.3x5 + \$6.4x2) for a total monthly rate of \$194.30

The Applicant Certifies That:

Project Title: Phase 1A Water Distribution System Improvements

Description:

The City of Alcester is proposes improvements to its Water Distribution System. The project will replace aging watermain and recoat and repair the City's water tower. The aging 4-inch watermain in Ofstad Street and the alley west of Hwy 11 from 1st Street to 3rd Street have been identified for replacement with 6-inch watermain. The Ofstad Street watermain replacement is planned in conjunction with sanitary sewer replacement. If funding cannot be secured for the sewer improvements, the City may redirect the SRF funding to replace the aging, undersized water main in 4th Street, currently planned as a future Phase 1B project.

The current monthly water rates for a 5,000 gallon user is \$53.75.

Project Title: Drinking Water Improvements Phase 1- Supply and Treatment, Storage, Distribution

Description:

City of Hill City is proposing the following:

- 1) Add well #5 onto the system to address supply shortfalls and add treatment for arsenic. This will optimize infrastructure the city currently owns, but does not use.
- 2) Install new distribution booster pumps and add new ground storage reservoir to the high pressure zone. The distribution booster pumps will significantly increase the effective storage capacity of the existing standpipe tank and the ground storage reservoir will provide redundancy to allow any of the three existing tanks to be pulled out of service in the event of failure or maintenance.
- 3) Replace existing zone separation gate valves with pressure-reducing valves to increase redundancy of the distribution system and allow for movement from the high-pressure zone to the base pressure zone at multiple different interfaces.
- 4) Install new GSR (ground storage reservoir) to the high-pressure zone.

Hill City's current water rate per 5,000 gallons is a usage fee of \$35.25 (\$0.00705 per gallon) plus an improvement surcharge of \$10.00 (\$0.002 per gallon) for the total of \$45.25.

TOTAL	\$5,520,000												

Project Title: Drinking Water Improvements Phase 1- Supply and Treatment, Storage, Distribution

Description:

City of Hill City is proposing the following:

- 1) Add well #5 onto the system to address supply shortfalls and add treatment for arsenic. This will optimize infrastructure the city currently owns, but does not use.
- 2) Install new distribution booster pumps and add new ground storage reservoir to the high pressure zone. The distribution booster pumps will significantly increase the effective storage capacity of the existing standpipe tank and the ground storage reservoir will provide redundancy to allow any of the three existing tanks to be pulled out of service in the event of failure or maintenance.
- 3) Replace existing zone separation gate valves with pressure-reducing valves to increase redundancy of the distribution system and allow for movement from the high-pressure zone to the base pressure zone at multiple different interfaces.
- 4) Install new GSR (ground storage reservoir) to the high-pressure zone.

Hill City's current water rate per 5,000 gallons is a usage fee of \$35.25 (\$0.00705 per gallon) plus an improvement surcharge of \$10.00 (\$0.002 per gallon) for the total of \$45.25.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

	TOTAL <u>\$1,946,000</u>

Project Title: N. West Street Drinking Water Improvements Project

Description:

The City of Canton seeks financial assistance to replace 10" line of water main that frequently breaks along N. West Street. The existing pipe is a Iron Pipe Size water main manufactured in the 1970s and which has become brittle with age and use. The City of Canton seeks to make water main improvements and increase capacity to the water system in order to have adequate water supply on West Street. West Street has had drainage issues that caused flooding in the street causing the system to overflow. The City proposes to make utility improvements to West Street which will include approximately 2,000 feet of 12" diameter water main.

Current monthly water rate for 5,000 gallons of usage is \$61.35.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Columbia Wastewater Lagoon and Wastewater Line Improvement Project

Description:

The City of Columbia is proposing to replace approximately 500 feet of sanitary sewer main that is sagging badly. They are also proposing to relocate the existing lagoon which is currently in the floodplain to a different location. This portion of the project would involve constructing a new lagoon system, installing a new lift station and approximately 9,500 linear feet of forcemain out to the new lagoon.

Current wastewater rates are a flat \$25.00 per user per month.

The Applicant Certifies That:

Project Title: Wastewater treatment infrastructure rehabilitation & Addition of second train of SBR

Description:

City of Hill City is proposing to construct a second train of sequencing batch reactor (SBR) to expand treatment capacity and rehabilitation of the existing wastewater system to improve functionality.

The addition of SBR includes a preliminary treatment building with a new vortex grit removal system, a new SBR basin, a new clariflocculator, a new fuzzy filter, and a new ultraviolet disinfection (UV train). These improvements will expand the treatment process to keep up with the flows and loads created by current and expanding future service population and create redundancy in the treatment process necessary to allow the City to access the equipment to perform maintenance.

The existing infrastructure rehabilitation includes replacing and repairing much of the equipment and electrical components that are reaching the end of design life. The lack of redundancy in the wastewater treatment system has prevented maintenance on some of the equipment.

Hill City's current sewer rate per 5,000 gallons is a usage fee of \$55.00 (\$0.011 per gallon) plus an improvement surcharge of \$6.25 (\$0.00125 per gallon) for the total of \$61.25.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Aberdeen Wastewater Treatment Facility Funding Application #2

Description:

The Wastewater Treatment Facility in Aberdeen is working to increase capacity due to residential and commercial growth. The lack of capacity for current wastewater levels limits Aberdeen with a lack of redundancies and inability to allow for future growth.

The City of Aberdeen has approved a bid from PKG Contracting Inc. of Fargo SD in the amount of \$91,758,099 for improvements and upgrades to the wastewater treatment facility. Aberdeen has secured \$23,896,900 in ARPA funds, which must be obligated by December 31, 2024, and \$32,426,100 in SRF funding for a total of \$56,323,000. Aberdeen is requesting \$30,000,000 to assist in upcoming project costs.

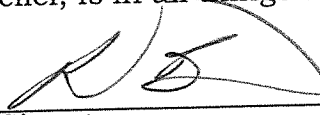

Aberdeen has 8,582 residential users and 951 commercial users. The city has the current wastewater rates at: \$36.65 for 5,000 gallons.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Wastewater Treatment Facility – Additional Funding

Funding Requested: \$30,000,000

Other Proposed Funding: \$5,000,000 – Local ARPA Funds
\$32,426,100 – CWSRF Loan C461072-04
\$18,896,900 – ARPA Grant 2022G-ARP-100

Total Project Cost: \$86,323,000

Project Description: The City of Aberdeen is increasing the capacity of its wastewater treatment facility with equipment replacement and improvements to treatment processes. Aberdeen was awarded an SRF loan and ARPA grant in April 2022 to fund this project. Due to increased materials costs, bids came in higher than expected, so the city is requesting additional funding.

Implementation Schedule: Aberdeen bid the project in September 2024 with a project completion date of July 2027.

Service Population: 28,495

Current Domestic Rate: \$36.65 per 5,000 gallons

Interest Rate: 3.75% Term: 30 years Security: Project Surcharge

Project Title: Phase 2 - Hwy 14/16 Trunk Sewer System Improvements

Description:

The City of Box Elder is proposing sanitary sewer main replacement of existing 10-In main with new main along Old Highway 1416, south and parallel of I-90 corridor. Phase 2 of this project continues the work of Phase 1. Phase 2 starts from Cottonwood Dr and runs to wastewater treatment plant. This segment of the project includes about 15,500 LF of 30-Inch and 36-Inch of sanitary sewer pipe. Mobilization, grading, backfill, traffic control signs, and easement acquisition are also included in this project. Recent inspections found high flow infiltration to the wastewater treatment system, indicating poor condition with offset joints, vegetative intrusions, etc. which allow ground and surface water to enter the collection system. In addition, bellies in the pipe, leaky gaskets and flattened pipe segments were identified throughout the existing system, resulting in high potential for groundwater contamination. As with any system with high rates of infiltration, leakage into the groundwater is known to occur when the groundwater is lower than the collection pipes, as in this case, posing significant health and safety concerns for residents down gradient on private wells.

Current wastewater rates for the City of Box Elder are \$68.50 per 5,000/gallons.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Wessington Springs Lagoon Improvements and Lift Station Rehabilitation

Description:

The City is proposing three separate activities which all benefit the wastewater treatment segment of the system. First, the ground abutting the lagoons needs to be regraded to improve drainage and eliminate inflow to the cells and standing water near the existing dikes. Secondly, the banks are eroded due to poor drainage and water action and in need of reshaping, placement of liner material and rip rap. The third element is improvements to the facility's lift station. Due to necessity and timing of outside funding the City has completed the majority of repairs to the lift station. The proposed project will improve the hoist system, upgrade electrical service and install a better wet well cover and hatch. All the proposed components are required to ensure adequate waste treatment for the community.

The current sewer rate for the residents is \$30.00 per 5,000 gallons. The rate will increase to \$33.80 on January 1, 2025.

Applicant: Town of Bison Address: 400 W Carr Street Bison, SD 57620 Subapplicant: Unique Entity ID: SKLDAQ72H8N4	Proposed Funding Package Requested Funding <u>\$370,000</u> Local Cash _____ Other: _____ Other: _____ Other: _____ TOTAL <u>\$370,000</u>
---	--

Project Title: Additional Funding Application- Wastewater and Storm Sewer Improvements

Description:

The Town of Bison applied for funding in 2021 from DANR to make several improvements to its wastewater collection and treatment system, including: 1) Cleaning and televising the entire collection system to determine the condition of the aging pipe infrastructure in order to prioritize replacement or refurbishment activities and identify potential locations where inflow & infiltration may be entering the collection system; 2) A combination of refurbishment and conventional replacement of existing manholes and clay sewer and PVC collection pipe to address known and anticipated deficiencies; 3) Improvements to the existing wastewater treatment facility to include fixing the pond berms, installation of riprap/geotextile, and additional repairs to the pond system in order to bring the system back into the status as it was originally built to and meet SD DANR required corrections; and, 4) Storm sewer diversion to include grading and rerouting of the storm water channel to divert it away from the wastewater lagoon. These improvements are underway, however there is a funding shortfall and the Town needs additional funding to complete the project.

Current rates are a base fee of \$25.00/month plus a \$30.00 project surcharge for the existing debt service, for a total rate of \$55.00.

The Applicant Certifies That:

Project Title: City of White SD Phase 2 Wastewater Collection System Improvements

Description:

The City of White is proposing to continue improvements to the municipal wastewater collection system which were started with a project (Phase 1) constructed in 2024 and 2025. The proposed Phase 2 project will include wastewater collection line replacement primarily south of Main Street and west of Hooker Ave (County Highway 25) in White SD.

Wastewater Collection lines proposed for replacement are vitrified clay pipe installed approximately 70 plus years ago. Video inspection of the collection system indicates many areas of fractured lines, open joints, vertical alignment concerns (sagging lines) creating potential sediment buildup and flow restrictions.

Current utility rates:

Base Rate = \$25.00/month
 2024 Project Surcharge = \$30.00/ month

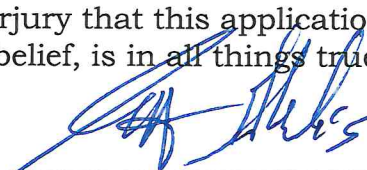

Current monthly fee \$55.00/month

Project Title: Webster Industrial Park Wastewater Project

Description:

The City of Webster is requesting funding to line the PVC pipes in their Industrial Park wastewater system. While investigating increased lift station usage at their industrial park, it was discovered that the gaskets that were used during replacement to PVC shrunk and the system has been opened up to infiltrates causing higher water amounts in the system.

Lining the pipes will allow continued usage of the system without replacement and will reduce the usage and wear on the lift station in Webster's Industrial park.

Current wastewater rates are \$55.05 per user for 1,096 users for 5,000 gallons.

The Applicant Certifies That:

Project Title: Western Avenue Utilities Extension

Description:

The Western Utilities Extension project consists of a utilities extension to serve areas west of Dell Rapids along SD Highway 115 out to 473rd Street. This project would extend sanitary sewer to an area previously unserved including a residential area to the north with large acreage parcels and undeveloped land to the south that will be developed soon. A lift station will be constructed to provide service and will connect into the existing gravity sewer system on the north side of SD Highway 115 approximately 1,000 feet east of Golf View Drive.

Sewer rate per 5,000 gallons of usage is \$75.72.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Phase IIa Sanitary Sewer Improvements

Description:

Replacing 3 blocks of existing sanitary sewer main on Prospect Street from 2nd Avenue to 5th Avenue. The project will also include two blocks of expansion, one block on Prospect Street from 2nd Avenue to 1st Avenue, and one 2nd Avenue from Prospect Street to Lee Street. All manholes, sanitary sewer main, sewer service pipe and connections will be replaced to the property line.

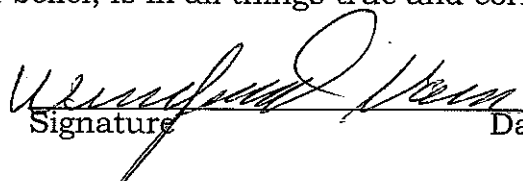

The two blocks of expansion will provide adequate depth of sewer main to serve two new apartment complexes off of 2nd Avenue that are currently serviced by lift station. The other expanded block will provide sewer services to a City owned block west of Prospect Street and allow one home to connect to City sewer and another to reduce their length of service line to the City's system.

The Applicant Certifies That:

Project Title: Sewer Improvements

Description:

Town of Keystone is proposing to upsize current 10-inch sewer line to 15-inch sewer line that runs from the edge of the eastern side of town to the lift station. Existing line flows to a maximum capacity at times during the summer season, when population increases due to the tourists in town. Combination of rain and snow melt can increase the flow during the spring. Taking no action can potentially cause backups in homes at the edge of town and will prevent new developments from occurring.

Current monthly rate for residential users per 5,000 gallons is a base fee of \$27.00 plus \$50.00 (0.010 per gallon) usage plus a \$2.00 surcharge for a total rate of \$79.00.

(5,000x0.01+27+2= \$79.00)

Project Title: Veblen Wastewater System Improvements

Description:

The City of Veblen has been experiencing issues with their wastewater collection system. Currently, they are out of compliance with their lagoon due to the amount of infiltrates in the system.

The Town of Veblen is proposing to televise the system to determine the number of replacement clay pipes or the ones that could be lined to get the system in compliance.

The main project will be replacing the lines that need to be and lining those that are determined to be good enough quality to line. Estimated costs of the system is based on lining some of the pipes if possible.

Current rates are flat rates and are: \$30.00 per user per month for 5,000 gallons. There are 140 users of their system and 317 residents.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Wastewater System Improvements

Description:

The application is to complete the replacement of the old lift station with a new, reliable lift station for Garden City. The new lift station would include removing the existing dry vault and utilizing a pre-packaged fiberglass lift station. This would include duplex submersible pumps and all controls. The existing lift station is not operating consistently and a borrowed pump is currently being utilized. The lift station was installed in 1978. This application would also include much needed improvements at the lagoons. These deficiencies have been noted in SD DANR report.

Current rate for 5,000 gallons is \$30.00 per quarter. This will be increased to to \$30 per month in the near future.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Statewide PFAS Foam, Solid Waste, or Waste Tire Cleanups

Description:

DANR proposes to continue to fund the statewide cleanup of PFAS foam, solid waste, and waste tires with SWMP funds. A primary use of these funds will be for DANR's Inspection, Compliance, and Remediation program to work with local entities for collection and disposal of per-and polyfluoroalkyl substances (PFAS) firefighting foam or other PFAS products.

A portion of these funds may be available to regional landfills in South Dakota to conduct waste tire collection and disposal events.

If needed, funds may also be utilized by school districts to remove old and potentially hazardous chemicals from their science classrooms and labs. DANR proposes to fund these projects with a one-time assistance of 50 percent cost share up to a maximum of \$10,000.

Finally, funds may be used for other solid waste cleanups or removals deemed necessary by DANR staff to protect the state's natural resources.

The Applicant certifies that:

I declare and affirm under the penalties of perjury that this application has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

Total Project Cost:	\$385,193.00														

Project Title: Huron Yard Waste Collection Truck

Description:

This truck will be used for collection of yardwaste material that is recycled into our compost. There is no additional fee to our community for this collection service as participants are already required to purchase their green container from our department. This truck will also be used as a backup when needed for our recycling route. The 3-year average for yard waste collection is 1,200 tons per year collected with an average of 37,392 containers serviced per year which is diverted from our waste stream through composting.

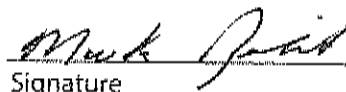

The city is requesting 50% of the funding from the South Dakota Department of Agriculture and Natural Resources Solid Waste Management Grant program in the form of a grant. The city will pay for the match out of city funding.

The Applicant certifies that:

I declare and affirm under the penalties of perjury that this application has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

Project Title: Mitchell Tractor-Scraper Purchase

Description:

The City of Mitchell provides multi-faceted solid waste operations including curbside collection of solid waste and single stream recycling, along with a Subtitle D sanitary landfill and Type IIA restricted use site. In reviewing current operations, City staff have determined the need to acquire a new tractor-scraper to operate at the landfill, as the current scraper is approaching the end of its expected service life. The requested scraper will allow the City to operate the landfill more efficiently.

The City respectfully requests grant funds to assist in purchasing the scraper. Due to the very beneficial impact the vehicle will have on landfill operations, City officials believe a grant award of 50% is justified.

Project Title: Acquisition of Two Recycling Trailers

Description:

Due to citizen requests the City of Platte proposes to acquire two recycling trailers in an effort to increase recycling availability within the community. The City has received a quote for two Pro-Tainer trailers, one with lids dedicated to recyclable materials and the second with slots for cardboard. Each trailer will have a 25 yard capacity within the 8' by 20' box, hydraulics, and tandem 6,000 pound axles. The City recognized the need to increase recycling efforts and has researched similar efforts in other communities. The City of Burke acquired a similar trailer for its recycling efforts and provided Platte with its lessons and success story. Implementation of a recycling program will address the top two goals within the Solid Waste Management Hierarchy; Volume reduction at the source and recycling and reuse. The City respectfully request a grant in the amount equal to 75% of the total project cost. It is believed a project which addresses the top items within the hierarchy justifies such a request.

Project Title: New Solid Waste Cell Construction

Description:

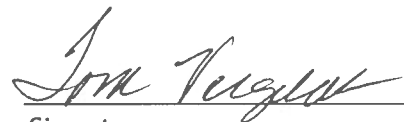

The Roberts County Landfill needs to replace their Loader which is an essential piece of equipment. Historically they have purchased used Loaders for their operations. However, the loader is a piece of equipment they use to move daily cover, recycling materials, solid waste, snow removal and other miscellaneous tasks that are essential to their operations. Therefore it is recommended that they purchase new equipment with warranty, for assurance on reliability. They are requesting funding assistance for this piece of equipment to make the purchase financially feasible.

The Applicant certifies that:

		Other: _____	_____
		Total Project Cost: <u>\$150,000</u>	

Project Title: Purchase of Equipment

Description:

The Southern Missouri Recycling and Waste Management District respectfully requests Solid Waste Management Program funds to assist in the purchase of a loader. Prior to opening the Subtitle D compliant facility west of Lake Andes the District's Board of Directors and consulting engineers determined that a bale fill operation was the best option for the District. Since this time the District has utilized a variation of equipment to move and load bales, manage loose fill from roll off containers, daily cover operations and property maintenance. The current equipment has been reliable but less so recently signaling its end of service life is near. The costs associated with continued maintenance coupled with the age of the machine requires the District to pursue a new loader.

The current disposal rates are \$60/ton for baleable waste and \$65/ton for roll off material. The rates as of January 1, 2025 will increase from \$60 to \$62 and \$65 to \$75.

The Applicant certifies that:

I declare and affirm under the penalties of perjury that this application has been examined by me, and to the best of my knowledge and belief, is in all things true and correct.

Project Title: Construction of Cell #4

Description:

The Southern Missouri Recycling and Waste Management District (SMRWMD) is proposing to commence development of a fourth disposal cell at their facility. It is the intent of the District to complete final closure of cell #3 in conjunction with expansion of the facility into the fourth cell. It is imperative the District remain diligent in developing cell #4, allowing the facility to continue operating at capacity while facilitating closure of cell #3 via excavation of cell #4. In an effort for a smooth and seamless transition SMRWMD has retained its consulting engineering firm from the previous expansion, Stockwell Engineering. Stockwell is charged with preparation of a detailed cost estimate and Facilities Plan. While there is some debate as to how soon cell #4 is needed the current plan calls for summer 2025 at the latest. The District is expected to apply for CWSRF funding on January 1, 2025 to finance the proposed project thus enabling construction to commence spring of 2025. Construction activities include unclassified excavation, placement and compaction of a clay liner, installation of a LDPE membrane liner and extension of the HDPE leachate collection and transportation piping. Please refer to the attached Facilities Plan for more detailed information.

The current disposal rates are \$60/ton for baleable waste and \$65/ton for roll off material. The rates as of January 1, 2025 will increase from \$60 to \$62 and \$65 to \$75.

The Applicant Certifies That:

Project Title: Water storage tank improvements and backup generator

Description:

Two Bit Ranch Estates HOA is proposing installation of a new backup generator for electricity for the well & booster station, and refurbishing the existing 20,000 gallon tank. Installation of a new backup generator would allow the system to continue operating during power outages and eliminate dependency on an operator having to manually turn the pumps on and off during emergencies. Refurbishing the existing 20,000 gallon tank will improve conditions for all necessary future inspections and maintenance to prolong the usable age of the tank. This alternative includes new coats of epoxy on the inside and outside of the tank, which will address current corrosion issues. It also proposes installing an exterior ladder and a 24" hatch to allow access for the equipment required to coat the tank .

Two Bit Ranch Estates HOA's current monthly water rate per 7,000 gallons is a base fee of \$83.33 plus a culligan fee of \$83.33 plus \$45.50 for usage (\$6.5 per 1,000 gallons) for a total rate of \$212.16/mo/user.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.

Project Title: Water Meter Project

Description:

Viewfield Rural Water Association, Inc is proposing to install new water meters with mobile reading system at each of the individual services on the system. Current meters must be manually read each month. With the vast area the system covers, this becomes very time consuming and leaks or breaks may go undetected for weeks. Viewfield currently has to pay someone to read the meters. New water meters with a mobile reading system would be beneficial to both the members and Viewfield. It will allow accurate tracking of the water usage loss. The system would come with billing software that the association could use to help increase the efficiency of their billing operations. In addition to installing new meters, Viewfield plans to relocate the SCADA System to a separate room from the treatment processes, along with system upgrades. The SCADA System upgrades include remote control of the systems pumps/wells. This would allow Viewfield to minimize the effects of a break or leak occurring within one of the pump houses. Viewfield's current rate per 7,000 gallons is \$130.00 per month.

The Applicant Certifies That:

I declare and affirm under the penalties of perjury that this application has been examined by me and, to the best of my knowledge and belief, is in all things true and correct.
