Note: **Systems advocacy** is generally used to change the policies of agencies, organizations or departments which are part of government or are established by government grants or contracts and operated under laws or governmental rules and policies. Frequently, these businesses provide unique services to specific populations, and you cannot just take your business elsewhere if you aren't happy with the service. The advocacy effort could be directed at a local, state, or national agency and it could be directed at changing a written or unwritten policy, or at changing a law. Where the effort is directed will depend on the nature of the problem and which organization has authority over the problem area.
