Chrissy, Peterson	Special Education Director - Meade School District	As the Special Education Director for Meade School District, I applaud the proposed language of making the Student Learning Objectives (SLOs) an optional part of the teacher evaluation process, as opposed to a requirement. The SLO's are mostly designed for classroom teachers. Specialists and special education teachers that do not have classrooms, work with students with emotional disabilities, and/or provide inclusionary support to classrooms find it very difficult to create objectives for the currently required SLO's that are worthwhile and measurable.
