### **Grant Review:**

A review of the grant applications was made by division staff, the State Conservation Commission, and district representatives.

### **Grant Selection:**

Chairman Doug Hansen outlined a possible new process for the Commission to consider in regards to selecting the order in which grant applications are selected for funding. Under the new process, each district that applied for grant funding would have their names put into the hat for the order in which funding is considered and awarded. In the case that a district with multiple applications is drawn, they would then need to identify their top priority project. The first round will continue until all district names are drawn or all available grant funds are

allocated. In the event there are still grant funds available after the first round of funding, the districts with multiple projects will be put into the hat again for a second round of lottery drawing, and so forth until all the available grant funds are allocated. This would introduce an additional aspect of fairness into the system by giving all the district applicants a chance of being considered for funding before an applicant with multiple applications is considered twice. A motion was made by Tom Glover and seconded to approve the new grant funding selection process as proposed. **Motion carried.**
