# Introduction

South Dakotans are part of a growing and dynamic global society that increasingly requires us to communicate knowledge and ideas within and across geographical, cultural, and linguistic boundaries. Languages learned and used in South Dakota include Native American languages, modern and classical world languages, and American Sign Language.

Individuals who effectively communicate in more than one language with an appropriate understanding of cultural contexts are globally literate and workplace ready. The study of other languages and cultures enables us to communicate in appropriate ways with people from other cultures. Exposure to other languages and cultures improves cognitive abilities such as critical thinking skills, problem solving abilities, and creativity.

South Dakota academic content standards serve as expectations for what students should know and be able to do by the end of each grade. They describe the knowledge and skills that every student should learn to graduate college, career, and life ready. Quality content standards should include critical content and skills, use clear and concise language, and make connections across learning levels and content domains. The chart below details the key features of quality standards.

**Quality Standards Checklist – Key Features of a Quality Standard**

| Standards Do...                                                                                                                                                                                          | Standards Do Not...                                                                                                                                                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Identify key knowledge and skills that students should demonstrate                                                                                                                                       | <ul style="list-style-type: none"><li>• Focus on teacher actions or what teachers should do to teach that content</li><li>• Require specific instructional strategies, approaches, curricula or text to be used</li><li>• Omit critical content</li></ul> |
| Connect learning across courses                                                                                                                                                                          | <ul style="list-style-type: none"><li>• Include unnecessary repetitive standards</li><li>• Create contradictions</li><li>• Create gaps in the progression of learning</li></ul>                                                                           |
| Use clear language that clarifies for all stakeholders what students should be able to know and do<br><i>*Keep in mind language in some standards may require more specificity than other standards.</i> | <ul style="list-style-type: none"><li>• Use ambiguous or vague language</li></ul>                                                                                                                                                                         |

The World Language Standards Committee meticulously reviewed each of the 2019 South Dakota World Language Standards for alignment with the Quality Standards Checklist. Drawing on their experience and expertise, the Committee provided recommendations to ensure the standards reflect current and best practices in language instruction. The World-Readiness Standards for Learning Languages developed by the American Council on the Teaching of Foreign Languages (ACTFL) and world language standards from other states were referred to during the review process.

South Dakota World Language Standards continue to reflect the themes in the *World Language Readiness Standards for Learning Languages* (2015), known as The Five Cs: Communication, Cultures, Connections, Comparisons, and Communities. These standards describe the *what* (content) of world language learning and form the core of standards-based instruction.

The revised South Dakota World Language Standards will continue to equip South Dakota students to effectively communicate in more than one language with an appropriate understanding of cultures, to be globally literate, and to be workplace ready.

# Summary of Changes

Revisions for this newest set of World Language standards primarily focused on improving the clarity of language. The term *target language* was added to several standards to clarify that each standard refers to the language being taught. Grammatical and formatting errors were corrected. Other notable changes include

- Reordered standards 1.1 and 1.2 to better align with the sequence of language learner skill development.
- Combined standards 2.1 (practices) and 2.2 (products) into one standard to eliminate redundancy.
- Moved *customs* from standards 2.1 and 2.2 into the definition of practices.
- Added a new 2.2 standard to explicitly include cultural competence in the standards.
- Changed the phrase *the nature of language and culture* to *the mechanics of language and nuances of culture* for clarity in standard 4.
- Changed the title of standard 5.2 to *Goals and Reflection* to better describe the standard.
- Changed *lifelong learner* to *learner* in standard 5.2 to make it a more measurable standard.

# Standards Revision Committee

| Name                   | Organization                                            | Position                                              |
|------------------------|---------------------------------------------------------|-------------------------------------------------------|
| Andrea Soto            | Tri-Valley School District – Tri-Valley High School     | Spanish and English Language Learner Teacher          |
| Fred Osborn            | Office of Indian Education                              | OIE Director                                          |
| Gayla Martens          | Center for Statewide E-learning                         | Spanish Teacher                                       |
| Jaclyn Lange           | Sioux Falls School District                             | K-5 Instructional Coach                               |
| Jan Mattes             | Yankton School District – Yankton High School           | Spanish and English Teacher                           |

| Kelly Royer            | Department of Education                                 | DOE Project Lead                                      |
| Vera Van Winkle        | Department of Education                                 | DOE Project Lead                                      |

## Communications Standards

Language learners develop reading, writing, speaking, and listening skills in a variety of situations.

| Standard Code                                                                      | Standard Code and Standard                                                                                                                                                                                                         |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Standard 1:<br/>Communication</b>                                               | Communicate effectively in <del>more than one</del> <b>the target</b> language for various purposes in multiple contexts.                                                                                                          |
| <b>1.1<br/>Interpersonal-<br/>Communication<br/>Interpretive<br/>Communication</b> | 1.1 <del>Share and infer information, reactions, feelings, and opinions in spoken, signed, or written conversation.</del> <b>Understand, interpret, and analyze what is viewed, heard, or read on a variety of topics.</b>         |
| <b>1.2 Interpretive-<br/>Communication<br/>Interpersonal<br/>Communication</b>     | 1.2 <del>Understand, interpret, and analyze what is viewed, heard, or read on a variety of topics.</del> <b>Exchange and understand information, reactions, feelings, and opinions in spoken, signed, or written conversation.</b> |
| <b>1.3<br/>Presentational<br/>Communication</b>                                    | 1.3 Present information, concepts, ideas, and opinions to <del>different</del> audiences in order to inform, <del>persuade</del> <b>explain</b> , <del>explain</del> <b>persuade</b> , and narrate on a variety of topics.         |

## Cultures Standards

Language learners explore the 3 Ps of culture through interactions between practices, products, and perspectives.

**Practices**— patterns of social interactions **and customs** within a particular culture and behaviors that represent the knowledge of “what to do when and where,” e.g., hygiene habits, approaches to personal space, greeting interactions (handshakes, hugs, kisses, bows), which side of the street/sidewalk on which to drive/walk.

**Products**—tangible or intangible creations of a particular culture. Tangible products: e.g., paintings, a cathedral, literature, drumming sticks.

Intangible products: e.g., an oral tale, a dance, a sacred ritual, a system of education, a law

**Perspectives**— meanings, attitudes, values, beliefs, ideas that underlie the cultural practices and products of a society and represent a culture’s view of the world, e.g., attitudes towards kinship/gender/education/privacy, religions, cosmology

| Standard Code                                                                             | Standard Code and Standard                                                                                                                                                                                                                       |
|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Standard 2:<br/>Cultures</b>                                                           | Interact with respect, <b>and</b> cultural competence, <del>in search of</del> <b>and</b> understanding <del>our world.</del>                                                                                                                    |
| <b>2.1 Cultural Practices <b>and</b> Products in Relation to Cultural Perspectives</b>    | 2.1 Use the <b>target</b> language to explore, reflect on, and explain the relationship between <del>the practices</del> <b>the practices</b> , <del>customs</del> <b>products</b> , and perspectives of the cultures studied.                   |
| <b>2.2 Cultural Products in Relation to Cultural Perspectives<br/>Cultural Competence</b> | 2.2 Use the <b>target</b> language to <del>explore, reflect on, and explain the relationship between the products, customs, and perspectives of the</del> <b>interact effectively and appropriately with the languages and</b> cultures studied. |

## Connections Standards

Language learners access and evaluate authentic and primary resources and make connections with other disciplines in both academic and career-related non-academic contexts.

| Standard Code                                                  | Standard Code and Standard                                                                                                                                                       |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Standard 3: Connections</b>                                 | Connect with other disciplines and acquire information and diverse perspectives through the target language.                                                                     |
| <b>3.1 Connections Across Disciplines</b>                      | 3.1 Acquire, expand, and reinforce knowledge of other disciplines using the target language to develop critical thinking, creativity, collaboration, and problem-solving skills. |
| <b>3.2 Acquisition of Information and Diverse Perspectives</b> | 3.2 Acquire, evaluate, and reflect on information and diverse perspectives available through the target language and its culture(s).                                             |

## Comparisons Standards

Language learners compare and contrast to improve their understanding of language(s) and culture(s).

| Standard Code                   | Standard Code and Standard                                                                                                                                                                           |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Standard 4: Comparisons</b>  | Develop insight into the nature mechanics of language and nuances of culture to enhance linguistic proficiency and cultural competence.                                                              |
| <b>4.1 Language Comparisons</b> | 4.1 Use the target language to investigate, explain, and reflect on the nature mechanics of language by comparing and contrasting their own language with others it to various languages.            |
| <b>4.2 Cultural Comparisons</b> | 4.2 Use the target language to investigate, explain, and reflect on the concept of culture the concept of culture by comparing and contrasting their own culture with others it to various cultures. |

## Communities Standards

~~Lifelong~~ Language learners use their language skills and cultural competence to engage in local, national, global, and virtual communities.

| Standard Code                                                 | Standard Code and Standard                                                                                                                                                                              |
|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Standard 5:<br/>Communities</b>                            | Communicate and interact in the <b>target</b> language with respect and cultural competence in both local and global communities.                                                                       |
| <b>5.1 School<br/>and Global<br/>Communities</b>              | 5.1 Interact and collaborate using the <b>target</b> language in the classroom, the community, and the world.                                                                                           |
| <b>5.2 Lifelong<br/>Learning<br/>Goals and<br/>Reflection</b> | 5.2 Set <del>lifelong</del> learning goals and reflect on progress in using the <b>target</b> language for enjoyment, enrichment, <del>enhancement</del> , and <del>advocacy</del> <b>advancement</b> . |
