Discussion of SDCL 36-1C-5:

Authority to Impose Fines under SDCL 36-1C-5 (“The agency may authorize the administrator to impose an administrative fine upon proof of a violation of specified statutes or rules without additional prior approval.”)

South Dakota Codified Law **36-1C-5. Option to authorize limited administrative fines for specified violations.**

The agency may authorize the administrator to impose an administrative fine upon proof of a violation of specified statutes or rules without additional prior approval. Any action taken pursuant to this section shall be reported to the agency at its next scheduled meeting or within thirty days, whichever is shorter.

Any administrative fine issued under this section may be appealed by requesting a contested case under chapter **1-26**. Notice of appeal must be submitted to the administrator within twenty calendar days of service of the fine.

Any fine issued under this section may not exceed five hundred dollars.

Update on Decoupling of Board Review/Education Approval:

At the May meeting, we presented information on the decoupling of board review/education from the exam. I was charged with obtaining opinions from the SD engineering and surveying societies.

For an update, North Dakota will be decoupled as of August 1, 2023.

Dear Chair Callaghan and Board Members,

At the suggestion of the Board of Technical Professions (BoTP) members during the May 19, 2023, Board meeting, the American Council of Engineering Companies of South Dakota requested information on the topic of decoupling from BoTP Executive Director Dyer. In turn, we provided this information to our 33 member firms and discussed the topic in depth at our June 2023 membership meeting.

Following a unanimous vote in favor of decoupling by members present, this letter formally communicates the American Council of Engineering Companies of South Dakota's support for the decoupling of the professional experience requirement from the PE exam. We offer this support with the understanding that the requirements for licensure (education, examination, and experience) will remain requirements to obtain a PE license in South Dakota. Further, several of our Board members have licensing experience in other state jurisdictions that have passed decoupling regulations. Our belief is that decoupling supports a pathway for young professionals to obtain licensure without compromising the 3-Es foundation critical to developing strong professional engineers.

Many of our member firms have young professionals currently traveling out of South Dakota to take the exam in states that have already decoupled, we believe the proposed regulatory change will be of great benefit. We understand that once these young professionals have passed the PE exam, it is our member firms' responsibility to ensure they are receiving mandatory mentored experience to complete the requirements for licensure.

Should the Board have any questions regarding this letter of support or are interested in having direct testimony, please do not hesitate to reach out to me or our Executive Director, Nancy Hoines, at acecofsd@gmail.com or 605.951.1004.

Sincerely,

A handwritten signature in black ink, appearing to read "Todd Kenner".

RE: Decoupling

Dear Chair Callaghan and Board Members,

With encouragement from the SD Board of Technical Professions (BoTP) members, given during the May 19th, 2023, BoTP meeting, the South Dakota Engineering Society (SDES) has spent the last several weeks discussing the topic of decoupling with our members.

The idea of decoupling should be diligently and carefully considered as it relates to the licensing of professional engineers with a commitment to protecting public health, safety, and welfare. Therefore, SDES' review of the decoupling topic has included sharing the information provided by the BoTP (Agenda Item 2.4a, May 19th, 2023) with members; an ongoing series of questions and answers with BoTP's Executive Director, Sherrie Dyer; research on other states' status; a polling of SDES membership; and a lengthy discussion at the SDES Board of Directors' meeting in July, including the thoughtful review of a white paper written by the 2014 members of the BoTP.

Based on our careful consideration and research into decoupling, the South Dakota Engineering Society Board of Directors offers our support in favor of the decoupling of the professional experience requirement from the PE exam, with the clear understanding that the current requirements for licensure (education, examination, and experience) will remain the same for applicants to obtain a PE license in South Dakota. We also support decoupling in the hope it eliminates the need for our members to travel out of state to take the PE exam and that it continues to promote the licensing of qualified Professional Engineers in South Dakota. However, decoupling should in no way lessen the importance and the requirement for candidates for licensure to meet and, hopefully, exceed the requirements for mentored experience and education.

Our position on decoupling is not clear cut however, with most of our concerns focused on how the concept of decoupling is implemented in practice. Therefore, as a condition of our support, the SDES Board requests the opportunity to be kept apprised and to be given the opportunity to review and comment on how decoupling affects the existing processes and rules as they are revised to accommodate decoupling. For example, [Administrative Rule 20:38:32:03](#) currently defines how many times an applicant can retake the PE exam in a given year, and also gives the BoTP the opportunity to review an applicant who has failed the exam more than three times and require additional qualifying education or experience. If the BoTP is no longer reviewing the

applicants for the exam, how are they notified of the three failures and how is the review implemented? As rules such as this are updated, we believe the public, including engineering professionals, should be notified and given the opportunity for comment.

The SDES Board does feel that due to the complexity of this issue and its specific relevancy to Professional Engineers and Professional Land Surveyors, that this item should not be voted on by the SD Board of Technical Professions until the currently vacant Professional Engineer and vacant Land Surveyor positions on the BoTP are filled and the new BoTP members are allowed to evaluate this issue.

We appreciate the BoTP's outreach on this topic and look forward to ongoing coordination between the BoTP and SDES. Should the Board have any questions regarding this letter of support or are interested in having direct testimony from the South Dakota Engineering Society Board, please do not hesitate to reach out to me at kyle.kurth@icloud.com or 605.291.5344, or our Executive Director, Nancy Hoines, at sdengineeringsociety@gmail.com or 605.951.1004.

Sincerely,

Kyle Kurth, PE
President
